

Storage Summary report customizations

OnCommand Unified Manager 9.5

NetApp

February 12, 2024

This PDF was generated from <https://docs.netapp.com/us-en/oncommand-unified-manager-95/online-help/task-customizing-the-storage-summary-report-to-view-capacity-by-cluster-models.html> on February 12, 2024. Always check docs.netapp.com for the latest.

Table of Contents

- Storage Summary report customizations 1
 - Customizing the Storage Summary report to view capacity by cluster models 1
 - Customizing the Storage Summary report to analyze cluster capacity based on the ONTAP version 1
 - Customizing the Storage Summary report to analyze clusters with the most unallocated LUN capacity 2
 - Customizing the Storage Summary report to analyze HA pairs for available capacity to provision new volumes and LUNs. 3

Storage Summary report customizations

You can customize Storage Summary reports to view and analyze information about storage capacity in HA pairs. You can use filters to display storage utilization by cluster model, capacity of the most unassigned LUNs, and capacity of available HA pairs to provision new volumes and LUNs.

Customizing the Storage Summary report to view capacity by cluster models

You can customize the Storage Summary report to analyze storage capacity and utilization of clusters, and to view aggregates included in the total raw capacity.

About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

Steps

1. To remove the grouping by cluster, perform the following steps:
 - a. Click in the column that needs to be ungrouped.
 - b. Click the  icon.
 - c. Select **Group > Delete Inner Group**.
2. To group the report by the model name, perform the following steps:
 - a. Click in the **Model** column and click the  icon.
 - b. Select **Group > Add Group**.
3. To add aggregates to the total raw capacity, perform the following steps:
 - a. Click in the **Total Raw Capacity** column and click the  icon.
 - b. Select **Aggregation**.
 - c. In the **Aggregation** dialog box, clear the **table level** check box and select the **group level** check box.
 - d. Enter a label name in the **Enter Label** field, if required.
4. Click **OK**.
5. To add aggregates to the other columns in the report, repeat Steps 3 and 4.

Customizing the Storage Summary report to analyze cluster capacity based on the ONTAP version

You can customize the Storage Summary report to group clusters by ONTAP version, and to view aggregates relating to your total raw capacity.

About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

Steps

1. To remove grouping by cluster, perform the following steps:
 - a. Click in the column that needs to be ungrouped.
 - b. Click  (menu icon).
 - c. Select **Group > Delete Inner Group option**.
2. To group the report by the ONTAP version, perform the following steps:
 - a. Click in the **OS version** column and select the  icon.
 - b. Select **Group > Add Group**.
3. To add aggregates to the total raw capacity, perform the following steps:
 - a. Click in the **Total Raw Capacity** column and click the  icon.
 - b. Select **Aggregation**.
 - c. In the **Aggregation** dialog box, clear the **table level** check box and select the **group level** check box.
 - d. Enter a label name in the **Enter Label** field, if required.
4. Click **OK**.

Customizing the Storage Summary report to analyze clusters with the most unallocated LUN capacity

You can customize the Storage Summary report to analyze the storage utilization of clusters, which enables you to locate the LUNs with the most unallocated capacity.

About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

Steps

1. To remove grouping by cluster, perform the following steps:
 - a. Click in the column that needs to be ungrouped.
 - b. Click the  icon.
 - c. Select **Group > Delete Inner Group**.
2. To sort HA pairs that have the most unallocated LUN capacity, click in the **Unallocated LUN Capacity (TB)** column, and click the  icon.
3. Select **Filter > Top/Bottom N**.

4. In the **Top/Bottom N** dialog box, select **Top N** from the **Filter** field and enter a value in the text field.
5. Click **OK**.

Customizing the Storage Summary report to analyze HA pairs for available capacity to provision new volumes and LUNs

You can customize the Storage Summary report to display available HA pairs that have capacity, so that you can provision new volumes and LUNs. The report displays HA pairs sorted in order of decreasing aggregate unused capacity.

About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

Steps

1. To remove grouping by cluster, perform the following steps:
 - a. Click in the column that needs to be ungrouped.
 - b. Click the  icon.
 - c. Select **Group > Delete Inner Group**.
2. To sort HA pairs with available capacity, click in the **Aggregate Unused Capacity (TB)** column, and click the  icon.
3. Select **Filter > Top/Bottom N**.
4. In the **Top/Bottom N** dialog box, select **Top N** from the **Filter** field and enter a value in the text field.
5. Click **OK**.
