Understand watchlist

Watchlists are used to access preselected systems inside Active IQ Digital Advisor quickly and easily. If you view a certain customer or a set of systems frequently, we recommend you create watchlists. You can create up to 50 watchlists and each watchlist can contain up to 15,000 systems by category or 500 systems by serial numbers.

When you access Active IQ Digital Advisor for the first time, you can either create a watchlist or search for a customer name, site name, group name, StorageGRID, hostname, cluster, serial number, or system ID.

You should also be aware of the colors applied to the cards, which indicate the severity and type of risks.
