Compare a config drift template 1

Compare a config drift template

You can compare the system and cluster configurations and detect the configuration deviations in near real time.

Steps

1. From the left pane, click **Config Drift**.
2. Select one of the existing templates or click **Add Template** to add a new template.
3. Generate a config drift report

You can generate a report immediately or you can schedule the report to be generated on a weekly or monthly basis.

To generate a report immediately	To schedule the report to be generated on a weekly or monthly basis
<ol style="list-style-type: none">1. Select a category and provide the requested values for the report.2. Select Include only drifts option to download only the configuration deviation changes.3. Click Submit.4. Download and view the config drift report.5. Run Ansible Playbook (included as part of the config drift report) to mitigate the drifts.	<ol style="list-style-type: none">1. Click the Schedule Report tab.2. Select a category and provide the requested values for the report.3. Select Include only drifts option to download only the configuration deviation changes.4. Select the frequency of the report.5. Select the start date and end date for the report.6. Click Submit.7. Download and view the config drift report.8. Run Ansible Playbook (included as part of the config drift report) to mitigate the drifts.

An email is sent with the details of the configuration deviation between the selected systems.
