# Use BlueXP edge caching

## End-user training

You will want to train your users on the best practices for accessing the shared files through BlueXP edge caching.

This is the final phase of the BlueXP edge caching deployment, the end-user implementation phase.

In order to prepare and streamline the end user on-boarding process, use the email template below that will help you to educate end users on what it means to work in a "central data" environment. This will help your users leverage all of the benefits of the BlueXP edge caching solution. We have also published a video that can be shared to "train" users where needed.

Customize and forward the following resources to end users to prepare them for roll-out:

- User Training video  
[End user training video](#)
- Email Template  
[Mac Email Template \(.emltp\)](#)  
[Windows Email Template \(.msg\)](#)
- Onboarding Communications  
[Word Document \(.docx\)](#)

See Chapter 14 in the [NetApp Global File Cache User Guide](#) for additional material.

## Additional information
