## Discover E-Series storage systems

BlueXP can discover the E-Series storage systems in your on-premises environment. Adding E-Series systems to BlueXP enables you to get a complete view of the data across your hybrid multicloud.

### What you'll need

- A Connector installed in a cloud provider or on your premises, with network connectivity to the E-Series storage system.

[Learn more about Connectors and how to create one](#)

- The domain name or IP address of the storage system controller.
- Admin credentials for the system.

### Steps

1. From the navigation menu, select **Storage > Canvas**.
2. From the Canvas, click **Add Working Environment** and select **On-Premises**.
3. Select **E-Series** and click **Next**.
4. If you're prompted, create a Connector.

Refer to the link above for more details.

5. On the *E-Series Cluster Details* page, enter the domain name or IP address of the storage system controller, admin credentials for the system, and then click **Add**.

### E-Series Cluster Details

**Provide a few details about your E-Series cluster so Cloud Manager can discover it.**

Storage System Controller Domain Name or IP Address

User Name

Password

**Result**

BlueXP discovers the E-Series storage system and adds it as a working environment on the Canvas.
