Add StorageGRID systems to NetApp Console 1

Get started

Add StorageGRID systems to NetApp Console

Manage your StorageGrid systems directly from the NetApp Console using Grid Manager.

Required NetApp Console role:

Storage admin or System health specialist. Learn about NetApp Console access roles.

Before you begin

You need the following:

- A NetApp Console Agent using version 3.9.43 or later. You must have the Organization admin role to install a Console Agent. If you don't know if your organization has a Console Agent, or if you need one created, contact your NetApp Console administrator. Contact your Organization admin.
- The domain name or IP address of the admin node.
- Admin credentials for the admin node.
- A management interface certificate installed on your StorageGRID system.

  Learn more about installing a management interface certificate on StorageGRID

Steps

1. From the navigation menu, select **Storage > Management**.
2. Select **Systems**.
3. Select **Add system** and select **On-Premises**.
4. Next to **StorageGRID**, select **Discover**.
5. On the *StorageGRID Cluster Details* page in the Console, enter the domain name or IP address of the admin node, the credentials for the node, and then select **Add**.
6. The Console automatically retrieves the StorageGRID management interface certificate. On the *Approve certificate* page, review the certificate details.
7. To use a different certificate, first set it up on your StorageGRID system.
   a. In your on-premises StorageGRID system, follow the instructions: Installing a management interface certificate on StorageGRID.
   b. After configuring the certificate in the StorageGRID system, select **Cancel** on the *Approve certificate* page in the Console.
   c. On the *StorageGRID Cluster Details* page, select **Add**.
8. Optionally, select **Copy Certificate** to copy the details of the certificate. You can use the certificate details to perform additional validation if desired.
9. Do one of the following:
   a. Select **Approve Certificate** to use the certificate.

      The NetApp Console displays a success message and secures all communication between the StorageGRID server and the Console Agent by verifying the approved certificate.

b. Select **Cancel** to end the discovery process without verifying the certificate.

   For example, you can select **Cancel** if you receive an error message notifying you that the StorageGRID management certificate needs to be updated.

   To update a certificate, go to your StorageGRID system, update the certificate, and then restart the discovery process from the NetApp Console.
