# Viewing and Managing Alerts from Monitors

Cloud Insights displays alerts when [monitored thresholds](#) are exceeded.

Monitors and Alerting is available in Cloud Insights Standard Edition and higher.

## Viewing and Managing Alerts

To view and manage alerts, do the following.

1. Navigate to the **Alerts > Integration Alerts** page.
2. A list of up to the most recent 1,000 alerts is displayed. You can sort this list on any field by clicking the column header for the field. The list displays the following information. Note that not all of these columns are displayed by default. You can select columns to display by clicking on the "gear" icon  :
  - **Alert ID:** System-generated unique alert ID
  - **Triggered Time:** The time at which the relevant Monitor triggered the alert
  - **Current Severity** (Active alerts tab): The current severity of the active alert
  - **Top Severity** (Resolved alerts tab); The maximum severity of the alert before it was resolved
  - **Monitor:** The monitor configured to trigger the alert
  - **Triggered On:** The object on which the monitored threshold was breached
  - **Status:** Current alert status, *New* or *In Process*
  - **Active Status:** *Active* or *Resolved*
  - **Condition:** The threshold condition that triggered the alert
  - **Metric:** The object's metric on which the monitored threshold was breached
  - **Monitor Status:** Current status of the monitor that triggered the alert

You can manage an alert by clicking the menu to the right of the alert and choosing one of the following:

- **In Process** to indicate that the alert is under investigation or otherwise needs to be kept open
- **Dismiss** to remove the alert from the list of active alerts.

You can manage multiple alerts by selecting the checkbox to the left of each Alert and clicking *Change Selected Alerts Status*.

Clicking on an Alert ID opens the Alert Detail Page.

## Alert Detail Page

The Alert Detail Page provides additional detail about the alert, including a *Summary*, an *Expert View* showing graphs related to the object's data, any *Related Assets*, and *Comments* entered by alert investigators.

## Alert Summary

### Monitor:

Volume Total Data

### Triggered On:

cluster\_name: tawny  
aggr\_name: Multiple\_Values

### Duration / Time Triggered:

1d 6h / Jun 9, 2020 2:22 AM

### Top Severity:

● Critical

### Metric:

① netapp\_ontap.workload\_volume.total\_data

### Condition:

Average total\_data is > (greater than) 0m and/or 0m all the time in 2-hour window.

### Filters Applied:

cluster\_name: Any

### Status:

New
