AddKeyServerToProviderKmip

You can use the `AddKeyServerToProviderKmip` method to assign a Key Management Interoperability Protocol (KMIP) key server to the specified key provider. During assignment, the server is contacted to verify functionality. If the specified key server is already assigned to the specified key provider, no action is taken and no error is returned. You can remove the assignment using the `RemoveKeyServerFromProviderKmip` method.

Parameters

This method has the following input parameters:

Name	Description	Type	Default value	Required
keyProviderID	The ID of the key provider to assign the key server to.	integer	None	Yes
keyServerID	The ID of the key server to assign.	integer	None	Yes

Return values

This method has no return value. The assignment is considered successful as long as there is no error returned.

Request example

Requests for this method are similar to the following example:

```
{
  "method": "AddKeyServerToProviderKmip",
  "params": {
    "keyProviderID": 1,
    "keyServerID": 15
  },
  "id": 1
}
```

Response example

This method returns a response similar to the following example:

```
{
  "id": 1,
  "result":
    {}
}
```

New since version

11.7
