RemoveClusterAdmin

You can use the `RemoveClusterAdmin` method to remove a cluster admin, an LDAP cluster admin, or a third-party Identity Provider (IdP) cluster admin. You cannot remove the "admin" Cluster Admin account.

Parameter

When an IdP cluster admin is removed that has authenticated sessions associated with a third-party Identity Provider IdP, those sessions will either logout or possibly experience a loss of access rights within their current session. The access rights loss will depend on whether the removed IdP cluster admin matched one of multiple IdP cluster admins from a given user's SAML attributes. The remaining set of matching IdP cluster admins results in a reduced set of aggregate access rights. Other cluster admin user types are logged out when their cluster admins are removed.

This method has the following input parameter:

Name	Description	Type	Default value	Required
clusterAdminID	ClusterAdminID for the Cluster Admin to remove.	integer	None	Yes

Return values

This method has no return values.

Request example

Requests for this method are similar to the following example:

```
{
  "method": "RemoveClusterAdmin",
  "params": {
    "clusterAdminID" : 2
  },
  "id" : 1
}
```

Response example

This method returns a response similar to the following example:

```
{  
  "id" : 1  
  "result" : { }  
}
```
