# SetClusterStructure

You can use the `SetClusterStructure` method to restore the storage cluster configuration information from a backup. When you call the method, you pass the `clusterStructure` object containing the configuration information you want to restore as the `params` parameter.

## Parameter

This method has the following input parameter:

Name	Description	Type
params	A JSON object containing the current storage cluster configuration information.	<a href="#">clusterStructure</a>

## Return values

This method has the following return values:

Name	Description	Type
result	Asynchronous result handle.	<code>asyncHandle</code>

## Request example

Requests for this method are similar to the following example:

```
{
  "method": "SetClusterStructure",
  "params": <insert clusterStructure object here>,
  "id" : 1
}
```

## Response example

This method returns a response similar to the following example:

```
{
  "id": 1,
  "result" : {
    "asyncHandle": 1
  }
}
```

## New since version

10.3
