snmpTrapRecipient

The snmpTrapRecipient object contains information about a host that is configured to receive SNMP traps generated by the storage cluster. You can use the `GetSnmpTrapInfo` API method to get a list of hosts configured to receive SNMP traps.

Object members

This object contains the following members:

Name	Description	Type
host	The IP address or host name of the target host.	string
port	The UDP port number on the host where the trap should be sent. Valid range is 1 through 65535. 0 (zero) is not a valid port number. The default port is 162.	integer
community	SNMP community string.	string
