View Fibre Channel sessions

You can view the Fibre Channel (FC) sessions that are connected to the cluster. You can filter information to include only those connections you want displayed in the window.

1. In the Element UI, select **Reporting > FC Sessions**.
2. To see the filter criteria fields, click **Filter**.

[Fibre Channel session details](#)

Fibre Channel session details

You can find information about the active Fibre Channel (FC) sessions that are connected to the cluster.

The following list describes the information you can find about the FC sessions connected to the cluster:

- **Node ID**

The node hosting the session for the connection.

- **Node Name**

System-generated node name.

- **Initiator ID**

A system-generated ID for the initiator.

- **Initiator WWPN**

The initiating worldwide port name.

- **Initiator Alias**

An optional name for the initiator that makes finding the initiator easier when in a long list.

- **Target WWPN**

The target worldwide port name.

- **Volume Access Group**

Name of the volume access group that the session belongs to.

- **Volume Access Group ID**

System-generated ID for the access group.
