# Work with Advanced Search

You can search for different components using the **Advanced Search** to add or remove components from your search criteria. You can use the search text box within the **Advanced Search** window to search for components.

You can use the following filters as needed:

- Select **Do not show Limited Support components** to prevent seeing components with limited support in the results.
- Select **Do not show EOVS components** to prevent seeing components with end-of-version support in the results.

From this page, you can also view the **Component Explorer, Load saved criteria or configurations**, or use the **Search Assistant**.
