Overview 1

Overview

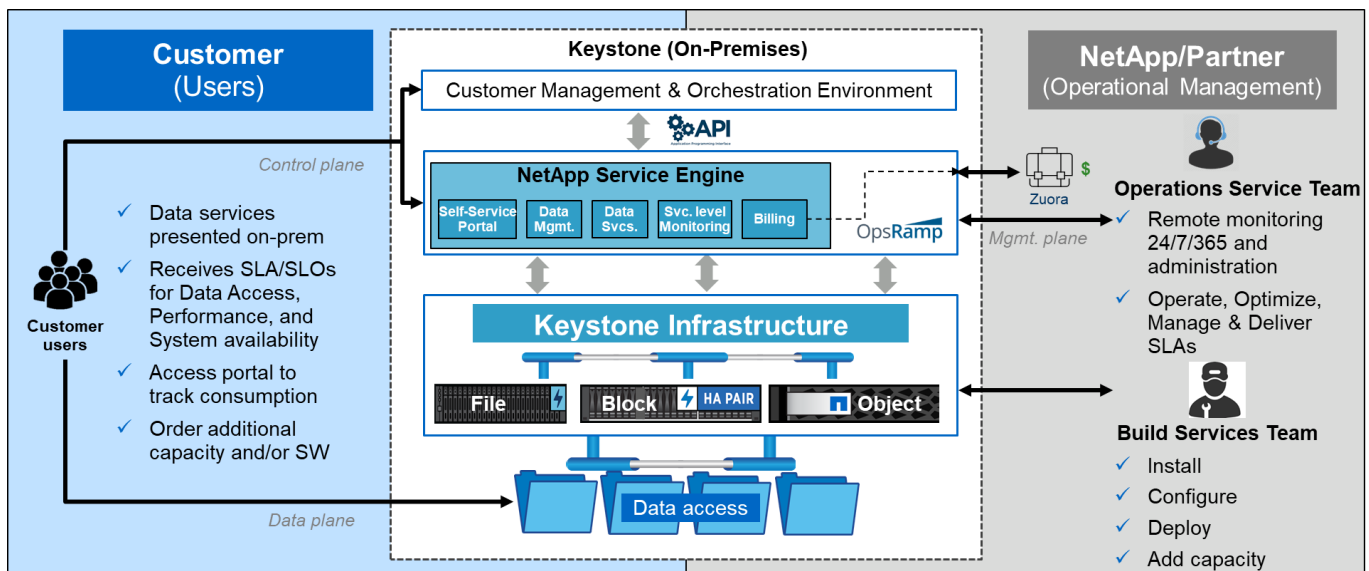

This section describes the KFS infrastructure architecture and management application for the NetApp- and customer-operated environments.

Keystone architecture, design, choice of technology, and products to be used reside solely with NetApp. NetApp reserves the rights to take the following actions:

- Select, substitute, or repurpose products.
- Refresh products with new technology when deemed appropriate.
- Increase or decrease capacity of the products to meet service requirements.
- Modify architecture, technology, and/or products to meet service requirements.

The Keystone service delivery model includes multiple components:

- Service interface with NetApp Service Engine.
- Keystone API's for integration.
- A Keystone service infrastructure. that includes storage controllers
- Tools to manage and operate the service such as OpsRamp, Active IQ, and AIQ Unified Manager.
