Overview 1

Overview

- KFS is available for a minimum of one year and up to three years. After the initial term, the service is renewable on an annual basis. Capacity can be increased in increments as small as 1 TiB.
- The minimum capacity is 100 TiB per site, and each site can have one or more clusters to meet the minimum capacity requirement.
- The 100 TiB capacity can be one single performance level or a combination of levels.
- 20% of burst capacity is available at each site; any burst usage is billed only for that billing period.
- Committed capacity or performance levels cannot be altered during a contract term.
- Increasing capacity or changing to higher performance level during term is allowed; however, moving from a higher performance level to a lower level is not permitted.
- Any change request in the last 90 days of the term requires the customer to renew the service for a minimum of one year.

For any additional burst requirements greater than 20%, please work with your Keystone Success Manager (KSM).
