TR-4722: MySQL Database on NetApp ONTAP Best Practices

Anup Bharti, Manohar Kulkarni, Jeffrey Steiner NetApp

MySQL and its variants, including MariaDB and Percona, are widely used for many enterprise applications. These applications range from global social networking sites and massive e-commerce systems to SMB hosting systems containing thousands of database instances. This document describes the configuration requirements and provides guidance on tuning and storage configuration for deploying MySQL on NetApp ONTAP data management software. To determine whether the environment, configurations, and versions specified in this report support your environment, consult the Interoperability Matrix Tool (IMT).
