# Topology

The Topology section, if applicable to an asset, enables you to see how a base asset is connected to its related assets.

The following shows an example of what might display in the Topology section of a virtual machine asset page.

## Topology

If the topology for the asset is larger than will fit in the section, the **Click link to see the topology** hyperlink is displayed instead.

## Using the Topology section

The Topology section enables you to view how the assets in your network are connected to each other and display information about related assets.

### Steps

1. Log in to the OnCommand Insight web UI.
2. Locate an asset page by doing either of the following:
  - On the Insight toolbar, click **Q**, type in the name of the asset, and then select the asset from the list.
  - Click **Dashboards**, select **Assets Dashboard**, locate an asset name, and click it. The asset page displays. You can find the Topology section in the upper right-hand corner of the asset page.

If the topology for the asset is larger than will fit in the section, click the **Click link to see the topology** hyperlink.

3. To view more information about the base asset's related assets, position your cursor over a related asset in the topology and click its name, which displays its asset page.
