Aggregate Capacity and Utilization Report customizations

You can customize reports to display a variety of information about aggregates.

Customizing the Aggregate Capacity and Utilization report to view aggregates reaching full capacity

You can customize the Aggregate Capacity and Utilization report to display aggregates sorted by increasing order of aggregate capacity utilization. This enables you to view the aggregates reaching full capacity.

About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

Steps

1. To remove grouping by cluster and by HA pair, perform the following steps:
 - a. Click in the columns that need to be ungrouped.
 - b. Click the  icon.
 - c. Select **Group > Delete Inner Group option**.
2. To sort the aggregates reaching full capacity, click in the **Days To Full** column, and click the  icon.
3. Select **Filter > Top/Bottom N**.
4. In the **Top/Bottom N** dialog box, select **Bottom N** from the **Filter** field and enter a value in the text field.
5. Click **OK**.

Customizing the Aggregate Capacity and Utilization report to display aggregates with the nearly full threshold breached

You can customize the Aggregate Capacity and Utilization report to display the top aggregates, sorted by decreasing order of Snapshot copy overflow percentage. This enables you to view the storage space still available in the aggregates.

About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

Steps

1. To remove the grouping by cluster or HA pair, perform the following steps:
 - a. Click in the column that needs to be ungrouped.
 - b. Click the  icon.
 - c. Select **Group > Delete Inner Group**.
2. To display the difference between the used data percentage and the nearly full threshold, add a new column:
 - a. Select a column and click the  icon.
 - b. Select **Column > New Computed Column**.
 - c. In the **New Computed Column** dialog box, enter a column label.
 - d. From the Select Category list, select **Math**.
 - e. From the **Select Function** list, select **DIFFERENCE**.
 - f. From the Column 1 list, select **Space Nearly Full Threshold (%)**.
 - g. From the Column 2 list, select **Used Data%**.
 - h. Click **OK**.
3. To filter the values greater than 0 in the new column, click in the **New computed column** and open the **Filter** dialog box by clicking the  icon.
4. From the **Condition** drop-down list, select **Greater Than**.
5. In the **Value** field, type 0 and click **OK**.
6. To sort the values, click in the **New computed column** and click the  icon.
7. Select **Filter > Top/Bottom N**.
8. In the **Top/Bottom N** dialog box, select **Top N** from the **Filter** field and enter a value in the text field.
9. Click **OK**.

Customizing the Aggregate Capacity and Utilization report to display aggregates with overcommitted threshold breached

You can customize the Aggregate Capacity and Utilization report to display the aggregates sorted by overcommitted capacity percentage, which enables you to view the storage space still available in the aggregates.

About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

Steps

1. To remove the grouping by cluster or HA pair, perform the following steps:
 - a. Click in the column that needs to be ungrouped.
 - b. Click the  icon.
 - c. Select **Group > Delete Inner Group**.
2. To display the difference between the overcommitted used percentage and the overcommitted threshold, add a new column.
 - a. Select a column and click .
 - b. Select **Column > New Computed Column**.
 - c. In the **New Computed Column** dialog box, enter a column label.
 - d. From the Select Category list, select **Math**.
 - e. From the **Select Function** list, select **DIFFERENCE**.
 - f. From the Column 1 list, select **Overcommitted Threshold (%)**.
 - g. From the Column 2 list, select **Overcommitted Capacity %**.
 - h. Click **OK**.
3. To filter the values greater than zero in the new column, click in the **New computed column** and open the **Filter** dialog box by clicking the  icon.
4. From the **Condition** list, select **Greater Than**.
5. In the **Value** field, type 0 and click **OK**.
6. To sort the values, click inside **New computed column** and click the  icon.
7. Select **Filter > Top/Bottom N**.
8. In the **Top/Bottom N** dialog box, select **Top N** from the **Filter** field and enter a value in the text field.
9. Click **OK**.

Customizing the Aggregate Capacity and Utilization report to display aggregates with noncompliant configuration

You can customize the Aggregate Capacity and Utilization report to display the aggregates filtered by the full threshold. This enables you to view the aggregates that might not comply with company policies.

About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

Steps

1. To remove the grouping by cluster or HA pair, perform the following steps:

- a. Click in the column that needs to be ungrouped.
 - b. Click the  icon.
 - c. Select **Group > Delete Inner Group**.
2. To filter aggregates threshold not exceeding 85%, click in the **Space Full Threshold** column and open the **Filter** dialog box by clicking the  icon.
3. From the **Condition** list, select **Greater Than**.
 4. Click **Select Values** and select **85**.
 5. Click **OK**.
