Customizing the NFS Exports report to display a list of volumes with default export policy 1

NFS Export report customizations

You can customize NFS export reports to analyze information about NFS export policies and rules for volumes on your storage systems. For example, you can customize reports to display volumes with inaccessible junction paths and volumes with the default export policy.

Customizing the NFS Exports report to display a list of volumes that have an inaccessible junction path

You can customize the NFS Exports report to display a list of volumes that have an inaccessible junction path.

About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

Steps

1. To remove the grouping by cluster or volume, perform the following steps:
   a. Click in the columns that need to be ungrouped.
   b. Click the icon.
   c. Select **Group** > **Delete Inner Group**.
2. To filter volumes that have an inaccessible junction path, click in the **Junction Path Active** column and open the **Filter** dialog box by clicking the icon.
3. From the **Condition** list, select **Equal To**.
4. Click **Select Values** and select **No**.
5. Click **OK**.

Customizing the NFS Exports report to display a list of volumes with default export policy

You can customize the NFS Exports report to display a list of volumes with default export policy.

About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

Steps

1. To remove the grouping by cluster or volume, perform the following steps:
   a. Click in the columns that need to be ungrouped.
   b. Click the icon.
   c. Select **Group** > **Delete Inner Group**.
2. To filter volumes with default export policy, click the **Export Policy** column and open the **Filter** dialog box by clicking the icon.
3. From the **Condition** list, select **Equal To**.
4. Click **Select Values** and select **Default**.
5. Click **OK**.
