# Volume Relationships Inventory report customizations

You can customize the Volume Relationships Inventory report to view the volume details that are filtered based on the source of failure. You can use filters to display volume relationships inventory details based on schedules, and to group volume inventory details based on issues.

## Customizing the Volume Relationships Inventory report to view volumes grouped by source of failure

You can customize the Volume Relationships Inventory report to view volumes grouped by source of failure.

### About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

### Steps

1. Select the **Relationship Health** column.
2. To view the volume details for bad volumes, click the — sign next to the **Bad** column.
3. To view the volume details for good volumes, click the — sign next to the **Good** column.

## Customizing the Volume Relationships Inventory report to view volumes grouped by issue

You can customize the Volume Relationships Inventory report to view volumes that are grouped according to the volume relationship health status.

### About this task

You can also perform this task by going to the Reports page and clicking **Run Report** for the appropriate report.

### Steps

1. To filter volumes according to the volume relationship health status, select the **Relationship Health** column, and click the  icon.
2. In the **Filter** dialog box, click **Select Values**, and then select the required value from the drop-down list.

The volume details for the selected value are displayed.
