statistics nfs commands

statistics nfs show-mount

Display mount statistics

Availability: This command is available to cluster administrators at the advanced privilege level.

Description

The statistics nfs show-mount command displays the following statistics about the NFS mounts on each node in the cluster:

- Result of the operations (success or failure)
- Total number of null operations
- Total number of mount operations
- Total number of dump operations
- Total number of unmount operations
- Total number of unmountall operations
- Total number of export operations
- Total number of exportall operations
- Total number of pathconf operations
- Total number of all the above operations

This command is designed to be used to analyze performance characteristics and to help diagnose issues.

Parameters

{-fields <fieldname>,…]
   If you specify the -fields <fieldname>, … parameter, the command output also includes the specified field or fields. You can use ‘-fields ?’ to display the fields to specify.

[-instance ]
   If you specify the -instance parameter, the command displays detailed information about all fields.

[-node {<nodename>|local}] - Node (privilege: advanced)
   If you specify this parameter, the command displays statistics only for the specified node.

[-result {success|failure|all}] - Result (privilege: advanced)
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified result (success/failure/all).

[-null <Counter with Delta>] - Null Operations (privilege: advanced)
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of null operations.
[-mount <Counter with Delta>] - Mount Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of mount operations.

[-dump <Counter with Delta>] - Dump Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of dump operations.

[-unmnt <Counter with Delta>] - UnMount Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of unmount operations.

[-unmntall <Counter with Delta>] - UnMountAll Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of unmountall operations.

[-export <Counter with Delta>] - Export Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of export operations.

[-exportall <Counter with Delta>] - ExportAll Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of exportall operations.

[-pathconf <Counter with Delta>] - PathConf Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of pathconf operations.

[-total <Counter64 with Delta>] - Total Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of total operations.

Examples
The following example displays statistics about the NFS mounts for a node named node1:
cluster1:*> statistics nfs show-mount -node node1

<table>
<thead>

**statistics nfs show-nlm**

(DEPRECATED)-Display NLM statistics

**Availability:** This command is available to *cluster* administrators at the *advanced* privilege level.

**Description**

The **statistics nfs show-nlm** command displays the following statistics about the Network Lock Manager (NLM) on each node in the cluster:

- Result of the operations (success or failure)
- Total number of null operations
- Total number of test operations
- Total number of lock operations
- Total number of cancel operations
- Total number of unlock operations
- Total number of granted operations
- Total number of share operations
- Total number of unshare operations
- Total number of nmlock operations
- Total number of freeall operations
- Total number of all the above operations

This command is designed to be used to analyze performance characteristics and to help diagnose issues.

This command requires an effective cluster version earlier than Data ONTAP 9.0. Data for nodes running Data ONTAP 9.0 or later is not collected, and will not be displayed. Use the `statistics show` `-object` `nlm` command instead.

**Parameters**

```
[-fields <fieldname>,...]
```

If you specify the `-fields <fieldname>, ...` parameter, the command output also includes the specified field or fields. You can use `-fields ?` to display the fields to specify.

```
[-instance ]
```

If you specify the `-instance` parameter, the command displays detailed information about all fields.

```
[-node {<nodename>|local}] - Node (privilege: advanced)
```

If you specify this parameter, the command displays statistics only for the specified node.

```
[-result {success|failure|all}] - Result (privilege: advanced)
```

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified result (success/failure/all).

```
[-null <Counter with Delta>] - Null Operations (privilege: advanced)
```

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of null operations.

```
[-test <Counter with Delta>] - Test Operations (privilege: advanced)
```

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of test operations.

```
[-lock <Counter with Delta>] - Lock Operations (privilege: advanced)
```

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of lock operations.

```
[-cancel <Counter with Delta>] - Cancel Operations (privilege: advanced)
```

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of cancel operations.

```
[-unlock <Counter with Delta>] - Unlock Operations (privilege: advanced)
```

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of unlock operations.
[-granted <Counter with Delta>] - Granted Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of granted operations.

[-share <Counter with Delta>] - Share Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of share operations.

[-unshare <Counter with Delta>] - Unshare Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of unshare operations.

[-nmlock <Counter with Delta>] - NmLock Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of nmlock operations.

[-freeall <Counter with Delta>] - FreeAll Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of freeall operations.

[-total <Counter64 with Delta>] - Total Operations (privilege: advanced)
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of total operations.

Examples
The following example displays statistics about the NLM for a node named node1:
cluster1::* > statistics nfs show-nlm -node node1

Node                   Value         Delta
node1                --------success-------
Null:                   0             -
Test:                   0             -
Lock:                   2       0/s:23s
Cancel:                 0             -
Unlock:                 1       0/s:23s
Granted:                 0             -
Share:                   0             -
Unshare:                 0             -
NmLock:                  0             -
FreeAll:                 0             -
Total:                   3       0/s:23s

Node                   Value         Delta
node1                --------failure-------
Null:                   0             -
Test:                   0             -
Lock:                   0             -
Cancel:                 0             -
Unlock:                 0             -
Granted:                 0             -
Share:                   0             -
Unshare:                 0             -
NmLock:                  0             -
FreeAll:                 0             -
Total:                   0             -

- statistics show

statistics nfs show-statusmon

Display status monitor statistics

Availability: This command is available to cluster administrators at the advanced privilege level.

Description

The statistics nfs show-statusmon command displays the following statistics about the Status Monitor on each node in the cluster:

- Result of the operations (success or failure)
• Total number of null operations
• Total number of stat operations
• Total number of monitor operations
• Total number of unmonitor operations
• Total number of unmonitor all operations
• Total number of simucrash operations
• Total number of notify operations
• Total number of all the above operations

This command is designed to be used to analyze performance characteristics and to help diagnose issues.

Parameters

{ [-fields <fieldname>,...] }  
If you specify the -fields <fieldname>, ... parameter, the command output also includes the specified field or fields. You can use '-fields ?' to display the fields to specify.

| [-instance ] }  
If you specify the -instance parameter, the command displays detailed information about all fields.

[ -node {<nodename>|local}] - Node (privilege: advanced)  
If you specify this parameter, the command displays statistics only for the specified node.

[ -result {success|failure|all}] - Result (privilege: advanced)  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified result (success/failure/all).

[ -null <Counter with Delta>] - Null Operations (privilege: advanced)  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of null operations.

[ -stat <Counter with Delta>] - Stat Operations (privilege: advanced)  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of stat operations.

[ -monitor <Counter with Delta>] - Monitor Operations (privilege: advanced)  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of monitor operations.

[ -unmonitor <Counter with Delta>] - Unmonitor Operations (privilege: advanced)  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of unmonitor operations.

[ -unmonall <Counter with Delta>] - Unmonitor All Operations (privilege: advanced)  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of unmonitor all operations.
[-simucrash <Counter with Delta>] - SimuCrash Operations (privilege: advanced)
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of simucrash operations.

[-notify <Counter with Delta>] - Notify Operations (privilege: advanced)
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of notify operations.

[-total <Counter64 with Delta>] - Total Operations (privilege: advanced)
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of total operations.

Examples

The following example displays statistics about the status monitor for a node named node1:

```
cluster1::*> statistics nfs show-statusmon -node node1
```

Node                   Value         Delta
node1               --------success-------
Null Ops:                  0             -
Stat Ops:                  0             -
Monitor Ops:               0             -
Unmonitor Ops:             0             -
Unmon All Ops:             0             -
SimuCrash Ops:             0             -
Notify Ops:                0             -
Total Ops:                 0             -

Node                   Value         Delta
node1               --------failure-------
Null Ops:                  0             -
Stat Ops:                  0             -
Monitor Ops:               0             -
Unmonitor Ops:             0             -
Unmon All Ops:             0             -
SimuCrash Ops:             0             -
Notify Ops:                0             -
Total Ops:                 0             -

`statistics nfs show-v3`

Display NFSv3 statistics

**Availability:** This command is available to cluster administrators at the admin privilege level.
Description

The `statistics nfs show-v3` command displays the following statistics about the NFSv3 operations on each node in the cluster:

- Result of the operations (success or failure)
- Total number of null operations
- Total number of getattr operations
- Total number of setattr operations
- Total number of lookup operations
- Total number of access operations
- Total number of readsymlink operations
- Total number of read operations
- Total number of write operations
- Total number of create operations
- Total number of mkdir operations
- Total number of symlink operations
- Total number of mknod operations
- Total number of remove operations
- Total number of rmdir operations
- Total number of rename operations
- Total number of link operations
- Total number of readdir operations
- Total number of readdirplus operations
- Total number of fsstat operations
- Total number of fsinfo operations
- Total number of pathconf operations
- Total number of commit operations
- Total number of nfsv3 operations
- Percent of null operations
- Percent of getattr operations
- Percent of setattr operations
- Percent of lookup operations
- Percent of access operations
- Percent of readsymlink operations
- Percent of read operations
- Percent of write operations
- Percent of create operations
- Percent of mkdir operations
This command is designed to be used to analyze performance characteristics and to help diagnose issues.

Parameters

{ [-fields <fieldname>,…] }  
If you specify the -fields <fieldname>, … parameter, the command output also includes the specified field or fields. You can use ‘-fields ?’ to display the fields to specify.

{ [-instance ] }  
If you specify the -instance parameter, the command displays detailed information about all fields.

[-node {<nodename>|local}] - Node  
If you specify this parameter, the command displays NFSv3 statistics only for the specified node.

[-result {success|failure|all}] - Result  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified result (success/failure/all).

[-null <Counter with Delta>] - Null Operations  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of null operations.

[-gattr <Counter with Delta>] - GetAttr Operations  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of getattr operations.

[-sattr <Counter with Delta>] - SetAttr Operations  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of setattr operations.

[-lookup <Counter with Delta>] - LookUp Operations  
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of lookup operations.
[-access <Counter with Delta>] - Access Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of access operations.

[-rsym <Counter with Delta>] - ReadSymlink Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of readsymlink operations.

[-read <Counter with Delta>] - Read Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of read operations.

[-write <Counter with Delta>] - Write Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of write operations.

[-create <Counter with Delta>] - Create Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of create operations.

[-mkdir <Counter with Delta>] - MkDir Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of mkdir operations.

[-symln <Counter with Delta>] - SymLink Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of symlink operations.

[-mknod <Counter with Delta>] - MkNod Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of mknod operations.

[-remove <Counter with Delta>] - Remove Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of remove operations.

[-rmdir <Counter with Delta>] - RmDir Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of rmdir operations.

[-rename <Counter with Delta>] - Rename Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of rename operations.

[-link <Counter with Delta>] - Link Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of link operations.

[-rdir <Counter with Delta>] - ReadDir Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the
specified number of readdir operations.

[-rdirp <Counter with Delta>] - ReadDirPlus Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of readdirplus operations.

[-fsstat <Counter with Delta>] - FsStat Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of fsstat operations.

[-fsinfo <Counter with Delta>] - FsInfo Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of fsinfo operations.

[-pconf <Counter with Delta>] - PathConf Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of pathconf operations.

[-commit <Counter with Delta>] - Commit Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of commit operations.

[-total <Counter64 with Delta>] - Total Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of total NFSv3 operations.

[-null-pct <Counter with Delta>] - Percent Null Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of null operations.

[-gattr-pct <Counter with Delta>] - Percent GetAttr Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of getattr operations.

[-sattr-pct <Counter with Delta>] - Percent SetAttr Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of setattr operations.

[-lookup-pct <Counter with Delta>] - Percent LookUp Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of lookup operations.

[-access-pct <Counter with Delta>] - Percent Access Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of access operations.

[-rsym-pct <Counter with Delta>] - Percent ReadSymlink Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of readsymlink operations.
[-read-pct <Counter with Delta>] - Percent Read Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of read operations.

[-write-pct <Counter with Delta>] - Percent Write Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of write operations.

[-create-pct <Counter with Delta>] - Percent Create Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of create operations.

[-mkdir-pct <Counter with Delta>] - Percent MkDir Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of mkdir operations.

[-symln-pct <Counter with Delta>] - Percent SymLink Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of symlink operations.

[-mknod-pct <Counter with Delta>] - Percent MkNod Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of mknod operations.

[-remove-pct <Counter with Delta>] - Percent Remove Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of remove operations.

[-rmdir-pct <Counter with Delta>] - Percent RmDir Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of rmdir operations.

[-rename-pct <Counter with Delta>] - Percent Rename Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of rename operations.

[-link-pct <Counter with Delta>] - Percent Link Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of link operations.

[-rdir-pct <Counter with Delta>] - Percent ReadDir Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of readdir operations.

[-rdirp-pct <Counter with Delta>] - Percent ReadDirPlus Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of readdirplus operations.

[-fsstat-pct <Counter with Delta>] - Percent FsStat Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the
specified percentage of fsstat operations.

[-fsinfo-pct <Counter with Delta>] - Percent FsInfo Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of fsinfo operations.

[-pconf-pct <Counter with Delta>] - Percent PathConf Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of pathconf operations.

[-commit-pct <Counter with Delta>] - Percent Commit Ops
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of commit operations.

Examples
The following example displays statistics about the NFSv3 operations for a node named node1:

```
cluster1::> statistics nfs show-v3 -node node1
```

statistics nfs show-v4

Display NFSv4 statistics

**Availability:** This command is available to *cluster* administrators at the *admin* privilege level.

**Description**

The `statistics nfs show-v4` command displays the following statistics about the NFSv4 operations on each node in the cluster:

- Result of the operations (success or failure)
- Total number of null operations
- Total number of compound operations
- Total number of access operations
- Total number of close operations
- Total number of commit operations
- Total number of create operations
- Total number of delegpurge operations
- Total number of delegret operations
- Total number of getattr operations
- Total number of getfh operations
- Total number of link operations
- Total number of lock operations
- Total number of lockt operations
- Total number of locku operations
- Total number of lookup operations
- Total number of lookupp operations
- Total number of nverify operations
- Total number of open operations
- Total number of openattr operations
- Total number of openconf operations
- Total number of opendowng operations
- Total number of putfh operations
- Total number of putpubfh operations
• Total number of putrootfh operations
• Total number of read operations
• Total number of readdir operations
• Total number of readlink operations
• Total number of remove operations
• Total number of rename operations
• Total number of renew operations
• Total number of restorefh operations
• Total number of savefh operations
• Total number of secinfo operations
• Total number of setattr operations
• Total number of setcliid operations
• Total number of setcliidconf operations
• Total number of verify operations
• Total number of write operations
• Total number of rellockown operations
• Total number of total operations
• Percent of null operations
• Percent of compound operations
• Percent of access operations
• Percent of close operations
• Percent of commit operations
• Percent of create operations
• Percent of delegpurge operations
• Percent of delegret operations
• Percent of getattr operations
• Percent of getfh operations
• Percent of link operations
• Percent of lock operations
• Percent of lockt operations
• Percent of locku operations
• Percent of lookup operations
• Percent of lookupp operations
• Percent of nverify operations
• Percent of open operations
• Percent of openattr operations
• Percent of openconf operations
- Percent of open downg operations
- Percent of putfh operations
- Percent of putpubfh operations
- Percent of putrootfh operations
- Percent of read operations
- Percent of readdir operations
- Percent of readlink operations
- Percent of remove operations
- Percent of rename operations
- Percent of renew operations
- Percent of restorefh operations
- Percent of savefh operations
- Percent of secinfo operations
- Percent of setattr operations
- Percent of setcliid operations
- Percent of setcliidconf operations
- Percent of verify operations
- Percent of write operations
- Percent of rellockown operations

This command is designed to be used to analyze performance characteristics and to help diagnose issues.

**Parameters**

`[-fields <fieldname>,...]`

If you specify the `-fields <fieldname>, ...` parameter, the command output also includes the specified field or fields. You can use `-fields ?` to display the fields to specify.

`[-instance ]`

If you specify the `-instance` parameter, the command displays detailed information about all fields.

`[-node {<nodename>|local}] - Node`

If you specify this parameter, the command displays NFSv4 statistics only for the specified node.

`[-result {success|failure|all}] - Result`

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified result (success/failure/all).

`[-null <Counter with Delta>] - Null Procedure`

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of null operations.
[-cmpnd <Counter with Delta>] - Compound Procedure
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of compound operations.

[-access <Counter with Delta>] - Access Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of access operations.

[-close <Counter with Delta>] - Close Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of close operations.

[-commit <Counter with Delta>] - Commit Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of commit operations.

[-create <Counter with Delta>] - Create Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of create operations.

[-delpur <Counter with Delta>] - Delegpurge Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of delegpurge operations.

[-delrtn <Counter with Delta>] - Delegret Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of delegret operations.

[-gattr <Counter with Delta>] - GetAttr Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of getattr operations.

[-getfh <Counter with Delta>] - GetFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of getfh operations.

[-link <Counter with Delta>] - Link Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of link operations.

[-lock <Counter with Delta>] - Lock Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of lock operations.

[-lockt <Counter with Delta>] - LockT Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of lockt operations.

[-locku <Counter with Delta>] - LockU Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the
specified number of locku operations.

[-lookup <Counter with Delta>] - Lookup Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of lookup operations.

[-lookpp <Counter with Delta>] - LookupP Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of lookupp operations.

[-nverify <Counter with Delta>] - Nverify Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of nverify operations.

[-open <Counter with Delta>] - Open Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of open operations.

[-opattr <Counter with Delta>] - OpenAttr Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of openattr operations.

[-opconf <Counter with Delta>] - OpenConf Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of openconf operations.

[-opndg <Counter with Delta>] - OpenDowng Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of opendowng operations.

[-putfh <Counter with Delta>] - PutFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of putfh operations.

[-putpfh <Counter with Delta>] - PutPubFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of putpubfh operations.

[-putrfh <Counter with Delta>] - PutRootFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of putrootfh operations.

[-read <Counter with Delta>] - Read Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of read operations.

[-readdir <Counter with Delta>] - ReadDir Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of readdir operations.
[-rlink <Counter with Delta>] - ReadLink Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of readlink operations.

[-remove <Counter with Delta>] - Remove Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of remove operations.

[-rename <Counter with Delta>] - Rename Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of rename operations.

[-renew <Counter with Delta>] - Renew Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of renew operations.

[-restfh <Counter with Delta>] - RestoreFh Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of restorefh operations.

[-savefh <Counter with Delta>] - SaveFh Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of savefh operations.

[-secinf <Counter with Delta>] - SecInfo Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of secinfo operations.

[-sattr <Counter with Delta>] - SetAttr Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of setattr operations.

[-sclid <Counter with Delta>] - SetCliId Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of setcliid operations.

[-scidc <Counter with Delta>] - SetCliIdConf Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of setcliidconf operations.

[-verify <Counter with Delta>] - Verify Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of verify operations.

[-write <Counter with Delta>] - Write Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
    specified number of write operations.

[-relown <Counter with Delta>] - RelLockOwn Operations
    If you specify this parameter, the command displays statistics only about the node or nodes that have the
specified number of rellockown operations.

[-total <Counter64 with Delta>] - Total Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of total nfsv4 operations.

[-null-pct <Counter with Delta>] - Percent Null Procedure
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of null operations.

[-cmpnd-pct <Counter with Delta>] - Percent Compound Procedure
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of compound operations.

[-access-pct <Counter with Delta>] - Percent Access Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of access operations.

[-close-pct <Counter with Delta>] - Percent Close Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of close operations.

[-commit-pct <Counter with Delta>] - Percent Commit Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of commit operations.

[-create-pct <Counter with Delta>] - Percent Create Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of create operations.

[-delpur-pct <Counter with Delta>] - Percent Delegpurge Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of delegpurge operations.

[-delrtn-pct <Counter with Delta>] - Percent Delegret Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of delegret operations.

[-gattr-pct <Counter with Delta>] - Percent GetAttr Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of getattr operations.

[-getfh-pct <Counter with Delta>] - Percent GetFh Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of getfh operations.

[-link-pct <Counter with Delta>] - Percent Link Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of link operations.
[-lock-pct <Counter with Delta>] - Percent Lock Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of lock operations.

[-lockt-pct <Counter with Delta>] - Percent LockT Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of lockt operations.

[-locku-pct <Counter with Delta>] - Percent LockU Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of locku operations.

[-lookup-pct <Counter with Delta>] - Percent Lookup Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of lookup operations.

[-lookpp-pct <Counter with Delta>] - Percent LookupP Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of lookupp operations.

[-nverfy-pct <Counter with Delta>] - Percent Nverify Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of nverify operations.

[-open-pct <Counter with Delta>] - Percent Open Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of open operations.

[-opattr-pct <Counter with Delta>] - Percent OpenAttr Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of openattr operations.

[-opconf-pct <Counter with Delta>] - Percent OpenConf Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of openconf operations.

[-opndg-pct <Counter with Delta>] - Percent OpenDowng Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of opendowng operations.

[-putfh-pct <Counter with Delta>] - Percent PutFh Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of putfh operations.

[-putpfh-pct <Counter with Delta>] - Percent PutPubFh Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of putpubfh operations.

[-putrfh-pct <Counter with Delta>] - Percent PutRootFh Operations
  If you specify this parameter, the command displays statistics only about the node or nodes that have the
specified percentage of putrootfh operations.

[-read-pct <Counter with Delta>] - Percent Read Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of read operations.

[-readdr-pct <Counter with Delta>] - Percent ReadDir Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of readdir operations.

[-rlink-pct <Counter with Delta>] - Percent ReadLink Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of readdir operations.

[-remove-pct <Counter with Delta>] - Percent Remove Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of remove operations.

[-rename-pct <Counter with Delta>] - Percent Rename Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of rename operations.

[-renew-pct <Counter with Delta>] - Percent Renew Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of renew operations.

[-restfh-pct <Counter with Delta>] - Percent RestoreFh Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of restorefh operations.

[-savefh-pct <Counter with Delta>] - Percent SaveFh Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of savefh operations.

[-secinf-pct <Counter with Delta>] - Percent SecInfo Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of secinfo operations.

[-sattr-pct <Counter with Delta>] - Percent SetAttr Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of setattr operations.

[-sclid-pct <Counter with Delta>] - Percent SetClid Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of setclid operations.

[-scidc-pct <Counter with Delta>] - Percent SetClidConf Operations
   If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of setclidconf operations.
[-verify-pct <Counter with Delta>] - Percent Verify Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of verify operations.

[-write-pct <Counter with Delta>] - Percent Write Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of write operations.

[-relown-pct <Counter with Delta>] - Percent RelLockOwn Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of rellockown operations.

Examples

The following example displays statistics about the NFSv4 operations for a node named node1:

```
cluster1::> statistics nfs show-v4 -node node1
```

<table>

statistics nfs show-v41

Display NFSv4.1 statistics

Availability: This command is available to cluster administrators at the admin privilege level.

Description

The statistics nfs show-v41 command displays the following statistics about the NFSv4.1 operations on each node in the cluster:

- Result of the operations (success or failure)
- Total number of null operations
- Total number of compound operations
- Total number of access operations
- Total number of close operations
- Total number of commit operations
- Total number of create operations
- Total number of delegpurge operations
- Total number of delegret operations
- Total number of getattr operations
- Total number of getfh operations
- Total number of link operations
- Total number of lock operations
- Total number of lockt operations
- Total number of locku operations
- Total number of lookup operations
- Total number of lookupp operations
- Total number of nverify operations
- Total number of open operations
- Total number of openattr operations
- Total number of openconf operations
- Total number of opendowng operations
- Total number of putfh operations
- Total number of putpubfh operations
• Total number of putrootfh operations
• Total number of read operations
• Total number of readdir operations
• Total number of readlink operations
• Total number of remove operations
• Total number of rename operations
• Total number of renew operations
• Total number of restorefh operations
• Total number of savefh operations
• Total number of secinfo operations
• Total number of setattr operations
• Total number of setcliid operations
• Total number of setcliidconf operations
• Total number of verify operations
• Total number of write operations
• Total number of rellockown operations
• Total number of total operations
• Percent of null operations
• Percent of compound operations
• Percent of access operations
• Percent of close operations
• Percent of commit operations
• Percent of create operations
• Percent of delegpurge operations
• Percent of delegret operations
• Percent of getattr operations
• Percent of getfh operations
• Percent of link operations
• Percent of lock operations
• Percent of lockt operations
• Percent of locku operations
• Percent of lookup operations
• Percent of lookupp operations
• Percent of nverify operations
• Percent of open operations
• Percent of openattr operations
• Percent of openconf operations
• Percent of opendowng operations
• Percent of putfh operations
• Percent of putpubfh operations
• Percent of putrootfh operations
• Percent of read operations
• Percent of readdir operations
• Percent of readlink operations
• Percent of remove operations
• Percent of rename operations
• Percent of renew operations
• Percent of restorefh operations
• Percent of savefh operations
• Percent of secinfo operations
• Percent of setattr operations
• Percent of setcliid operations
• Percent of setCliidconf operations
• Percent of verify operations
• Percent of write operations
• Percent of rellockown operations

This command is designed to be used to analyze performance characteristics and to help diagnose issues.

Parameters

{[-fields <fieldname>,…]}

If you specify the -fields <fieldname>, ... parameter, the command output also includes the specified field or fields. You can use ‘-fields ?’ to display the fields to specify.

| [-instance ]

If you specify the -instance parameter, the command displays detailed information about all fields.

[-node {<nodename>|local}] - Node

If you specify this parameter, the command displays NFSv4.1 statistics only for the specified node.

[-result {success|failure|all}] - Result

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified result (success/failure/all).

[-null <Counter with Delta>] - Null Procedure

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of null operations.
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of compound operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of access operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of close operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of commit operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of create operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of delegpurge operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of delegret operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of getattr operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of getfh operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of link operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of lock operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of lockt operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of locku operations.
specified number of locku operations.

`[-lookup <Counter with Delta>]` - Lookup Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of lookup operations.

`[-lookpp <Counter with Delta>]` - LookupP Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of lookupp operations.

`[-nverfy <Counter with Delta>]` - Nverify Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of nverify operations.

`[-open <Counter with Delta>]` - Open Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of open operations.

`[-opattr <Counter with Delta>]` - OpenAttr Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of openattr operations.

`[-opconf <Counter with Delta>]` - OpenConf Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of openconf operations.

`[-opndg <Counter with Delta>]` - OpenDowng Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of opendowng operations.

`[-putfh <Counter with Delta>]` - PutFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of putfh operations.

`[-putpfh <Counter with Delta>]` - PutPubFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of putpubfh operations.

`[-putrfh <Counter with Delta>]` - PutRootFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of putrootfh operations.

`[-read <Counter with Delta>]` - Read Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of read operations.

`[-readdr <Counter with Delta>]` - ReadDir Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of readdir operations.
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of readlink operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of remove operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of rename operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of renew operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of restorefh operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of savefh operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of secinfo operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of setattr operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of setcliid operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of setcliidconf operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of verify operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of write operations.

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of relown operations.
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified number of total nfsv4.1 operations.

[-total <Counter64 with Delta>] - Total Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of null operations.

[-null-pct <Counter with Delta>] - Percent Null Procedure

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of compound operations.

[-cmpnd-pct <Counter with Delta>] - Percent Compound Procedure

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of access operations.

[-access-pct <Counter with Delta>] - Percent Access Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of close operations.

[-close-pct <Counter with Delta>] - Percent Close Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of commit operations.

[-commit-pct <Counter with Delta>] - Percent Commit Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of create operations.

[-create-pct <Counter with Delta>] - Percent Create Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of delegpurge operations.

[-delpur-pct <Counter with Delta>] - Percent Delegpurge Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of delegret operations.

[-delrtn-pct <Counter with Delta>] - Percent Delegret Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of getattr operations.

[-gattr-pct <Counter with Delta>] - Percent GetAttr Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of getfh operations.

[-getfh-pct <Counter with Delta>] - Percent GetFh Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of link operations.

[-link-pct <Counter with Delta>] - Percent Link Operations
[-lock-pct <Counter with Delta>] - Percent Lock Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of lock operations.

[-lockt-pct <Counter with Delta>] - Percent LockT Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of lockt operations.

[-locku-pct <Counter with Delta>] - Percent LockU Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of locku operations.

[-lookup-pct <Counter with Delta>] - Percent Lookup Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of lookup operations.

[-lookpp-pct <Counter with Delta>] - Percent LookupP Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of lookpp operations.

[-nverfy-pct <Counter with Delta>] - Percent Nverify Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of nverify operations.

[-open-pct <Counter with Delta>] - Percent Open Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of open operations.

[-opattr-pct <Counter with Delta>] - Percent OpenAttr Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of openattr operations.

[-opconf-pct <Counter with Delta>] - Percent OpenConf Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of openconf operations.

[-opndg-pct <Counter with Delta>] - Percent OpenDowng Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of opendowng operations.

[-putfh-pct <Counter with Delta>] - Percent PutFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of putfh operations.

[-putpfh-pct <Counter with Delta>] - Percent PutPubFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of putpubfh operations.

[-putrfh-pct <Counter with Delta>] - Percent PutRootFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of putrootfh operations.
specified percentage of putrootfh operations.

[-read-pct <Counter with Delta>] - Percent Read Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of read operations.

[-readdr-pct <Counter with Delta>] - Percent ReadDir Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of readdir operations.

[-link-pct <Counter with Delta>] - Percent ReadLink Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of readdir operations.

[-remove-pct <Counter with Delta>] - Percent Remove Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of remove operations.

[-rename-pct <Counter with Delta>] - Percent Rename Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of rename operations.

[-renew-pct <Counter with Delta>] - Percent Renew Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of renew operations.

[-restfh-pct <Counter with Delta>] - Percent RestoreFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of restorefh operations.

[-savefh-pct <Counter with Delta>] - Percent SaveFh Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of savefh operations.

[-secinf-pct <Counter with Delta>] - Percent SecInfo Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of secinfo operations.

[-sattr-pct <Counter with Delta>] - Percent SetAttr Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of setattr operations.

[-sclid-pct <Counter with Delta>] - Percent SetChild Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of setchild operations.

[-scidc-pct <Counter with Delta>] - Percent SetChildConf Operations
If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of setchildconf operations.
[-verify-pct <Counter with Delta>] - Percent Verify Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of verify operations.

[-write-pct <Counter with Delta>] - Percent Write Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of write operations.

[-relown-pct <Counter with Delta>] - Percent RelLockOwn Operations

If you specify this parameter, the command displays statistics only about the node or nodes that have the specified percentage of relockown operations.

Examples

The following example displays statistics about the NFSv4.1 operations for a node named node1:

```bash
cluster1::> statistics nfs show-v41 -node node1
```

<table>
