security ha-network commands

security ha-network modify

Modify HA network security configuration

Availability: This command is available to *cluster* administrators at the *admin* privilege level.

Description

The `security ha network modify` command modifies the HA network security in a cluster.

Parameters

-enabled {true|false} - HA Network Security Enabled

Whether to enable ha network security.

Examples

The following example enables the ha network security configuration.

```
cluster1:: security ha network modify -enabled true
```

security ha-network show

Show HA network security configuration

Availability: This command is available to *cluster* administrators at the *admin* privilege level.

Description

The `security ha-network show` command displays the HA network security in a cluster.

Parameters

{ [-fields <fieldname>,...]

If you specify the `-fields <fieldname>, ...` parameter, the command output also includes the specified field or fields. You can use `'-fields ?'` to display the fields to specify.

| [-instance] }

If you specify the `-instance` parameter, the command displays detailed information about all fields.

[-node {<nodename>|local}] - Node Name

Node name.

`[-enabled {true|false}]` - HA Network Security Enabled

This parameter shows the status of the HA network security.
