director events

director.aggr events

director.aggr.reassigned

Severity

NOTICE

Description

This message occurs when an aggregate is being reassigned from one node to another node. The output contains the Firefly ID and node ID of both nodes as well as whether or not the operation was done forcefully. The value of isForceful is "true" if an aggregate is moved in response to a error condition on the cluster rather than a user requested operation.

Corrective Action

(None).

Syslog Message

Aggregate (ID %u) is being reassigned (forcefully:%u) from node "%s" (ID "%u", Firefly ID: "%u") to node "%s" (ID "%u", Firefly ID: "%u").

Parameters

aggrID (INT): Unique identifier of the aggregate being reassigned.
isForceful (INT): Boolean value to denote whether or not the reassignment was done forcefully.
fromNode (STRING): Name of the node that the aggregate is being reassigned from.
fromNodeID (INT): Unique identifier of the node that the aggregate is being reassigned from.
fromFireflyID (INT): Unique identifier of the Firefly Service that the aggregate is reassigned to.
toNode (STRING): Name of the node that the aggregate is being reassigned to.
toNodeID (INT): Unique identifier of the node that the aggregate is being reassigned to.
toFireflyID (INT): Unique identifier of the Firefly Service that the aggregate is reassigned to.

director.dataip events

director.dataip.reassigned

Severity

NOTICE

Description

This message occurs when a data IP address is being reassigned from one node to another node. The output contains the node ID of both nodes as well as whether or not the operation was done forcefully. The value of isForceful is "true" if the data IP is moved in response to a error condition on the cluster rather than a user requested operation.

Corrective Action

(None).

Syslog Message

Data IP address "%s" (ID "%u") is being reassigned (forcefully:"%u") from node "%s" (ID "%u") to node "%s" (ID: "%u").

Parameters

dataip (STRING): IP address of the data IP.

dataipID (INT): Unique identifier of the data IP.

isForceful (INT): Boolean value to denote whether or not the reassignment was done forcefully.

fromNode (STRING): Name of the node from which the data IP is being reassigned.

fromNodeID (INT): Unique identifier of the node from which the data IP is being reassigned.

toNode (STRING): Name of the node to which the data IP is being reassigned.

toNodeID (INT): Unique identifier of the node to which the data IP is being reassigned.
