migrate events

migrate.root events

migrate.root.completed

Severity

NOTICE

Description

This message occurs when the migration of a root aggregate has completed successfully.

Corrective Action

(None).

Syslog Message

Root aggregate migration completed successfully on node %s.

Parameters

node (STRING): Name of the node that completed the migration.

migrate.root.failed

Severity

ERROR

Description

This message occurs when the migration of a root aggregate has failed.

Corrective Action

Run the "system node run -node nodename -command aggr status" command to determine if the target aggregate named "new_root" has been created. If not, address the error condition and attempt the "system node migrate-root" command again. If the new aggregate exists, contact technical support to complete the operation.

Syslog Message

Root aggregate migration failed on node %s. Reason: %s.

Parameters

node (STRING): Name of the node that failed to complete the migration.

reason (STRING): Reason that the migrate operation failed.

migrate.root.started

Severity

NOTICE

Description

This message occurs when the user initiates an attempt to move the root aggregate to a different set of disks on a node.

Corrective Action

(None).

Syslog Message

Root aggregate migration started on node %s.

Parameters

node (STRING): Name of the node.
