cmds events

cmds.config events

cmds.config.file.delete

Severity

NOTICE

Description

This message occurs when there is an error in deleting the specified file.

Corrective Action

(None).

Syslog Message

%s: Error in deleting %s: (%s).

Parameters

funcname (STRING): Function name.

fname (STRING): File name.

errMessage (STRING): Error message.

cmds.software events

cmds.software.dirErr

Severity

ERROR

Description

This message occurs because the system cannot create the directory at the designated path.

Corrective Action

(None).

Syslog Message

Could not create directory %s: %s

Parameters

path (STRING): Path where directory was supposed to be created.

errorMsg (STRING): Error message.

cmds.software.installDone

Severity

INFORMATIONAL

Description

This message occurs during software update and installation to inform you that the installation is complete.

Corrective Action

(None).

Syslog Message

Software: Installation of %s was completed.

Parameters

fileName (STRING): Name of the file to be updated/installed.

cmds.software.installNotDone**Severity**

INFORMATIONAL

Description

This message occurs during software update and installation to inform you that installation failed.

Corrective Action

(None).

Syslog Message

Software: Installation of %s failed.

Parameters

fileName (STRING): Name of the file to be updated/installed.

cmds.sysconf events**cmds.sysconf.haltERR1****Severity**

ALERT

Description

This message occurs to log the reason for system halt, before actually system is halted.

Corrective Action

(None).

Syslog Message

Halting system due to %d configuration problems.

Parameters

errCount (INT): Number of error which caused the system halt.

cmds.sysconf.haltERR2

Severity

ALERT

Description

This message occurs to log the reason for system halt, before actually system is halted.

Corrective Action

(None).

Syslog Message

Halting system due to a configuration problem.

Parameters

(None).

cmds.sysconf.inconstRule

Severity

INFORMATIONAL

Description

This message occurs because the rule for the card is applicable to both non_cluster_only and cluster_only systems, which is inconsistent.

Corrective Action

(None).

Syslog Message

Rule for model %s card %s is inconsistent: it applies both to cluster-only and non-cluster-only.

Parameters

model (STRING): Model ID.

card (STRING): Card ID.

cmds.sysconf.logErr

Severity

NOTICE

Description

This message occurs to log the error through syslog as an Error or Informational message depending upon the error count which is in this case greater than 0.

Corrective Action

(None).

Syslog Message

%s.

Parameters

errMsg (STRING): Error message to be logged.

cmds.sysconf.logInfo

Severity

INFORMATIONAL

Description

This message occurs to log the error through syslog as an Error or informational message depending upon the error count which is in this case less than or equal to 0.

Corrective Action

(None).

Syslog Message

%s.

Parameters

errMsg (STRING): Error message to be logged.

cmds.sysconf.perIntSmall

Severity

INFORMATIONAL

Description

This message occurs because the value for a periodic interval for internal testing is set too small, less than the minimum allowed.

Corrective Action

(None).

Syslog Message

options.sysconfig.periodic_interval of %d minutes is too small; using %d.

Parameters

valueUsed (INT): Value used for testing purpose.

defaultMinValue (INT): Minimum value allowed for a periodic interval.

cmds.sysconf.syslogger

Severity

NOTICE

Description

This message occurs to send the output to syslog rather than command prompt because the option '-l' with sysconfig command is not documented and is included in DEBUG builds only.

Corrective Action

(None).

Syslog Message

%s.

Parameters

message (STRING): 'sysconfig -l' Command output message.
