perf events

perf.ccma events

perf.ccma.off

Severity

ALERT

Description

This message occurs when the performance archiver is not enabled, which makes it difficult for technical support to troubleshoot performance issues on the system.

Corrective Action

Enable the performance archiver to track system activity and allow technical support to troubleshoot performance problems by running the "statistics archive config modify -is-enabled true" command. Note that the performance archiver is disabled during takeover and giveback, and in a failure scenario when the archiver loses communication with the Counter Manager Quota Management system; these two scenarios do not resolve by administratively enabling the archiver.

Syslog Message

Performance archiver is not enabled for datastore '%s'.

Parameters

datastore (STRING): Datastore name.

perf.ccma.startupFailed

Severity

ALERT

Description

This message occurs when the performance archiver fails to startup.

Corrective Action

(None).

Syslog Message

Performance archiver failed to startup.

Parameters

reason (STRING): Reason for failure to startup

perf.ccma.stop

Severity

NOTICE

Description

This message occurs when the performance archiver is disabled.

Corrective Action

(None).

Syslog Message

Performance archiver stopped.

Parameters

(None).
