ucm events

ucm.disabled events

ucm.disabled.slot

Severity

ERROR

Description

This message occurs when the Unified Target Adapter reads an invalid mode from flash memory. The valid supported modes are FC (0x1) or CNA (0x2). The adapter's flash memory has failed or has been corrupted. The adapter will be disabled.

Corrective Action

Contact NetApp technical support.

Syslog Message

Disabling adapter %s because invalid mode %d was read from nonvolatile memory.

Parameters

adapter (STRING): Name of the affected adapter.
faultyMode (INT): Value of the mode read from flash memory.

ucm.mode events

ucm.mode.autoReboot

Severity

INFORMATIONAL

Description

This message occurs when the FC adapter or converged networking adapter is reconfigured from a backup. The reconfiguration requires a reboot to enable correct adapter operation. The reboot occurs automatically.

Corrective Action

A change in the FC adapter or converged networking adapter mode configuration has occurred. The system is being rebooted to enable the new adapter configuration.

Syslog Message

Rebooting for adapters %s to become available.

Parameters

adapters (STRING): Affected adapters.

ucm.mode.changed

Severity

INFORMATIONAL

Description

This message occurs when the user changes the personality mode on a configurable adapter. The new mode will take effect on the next controller reboot.

Corrective Action

(None).

Syslog Message

Personality mode has changed to %s on adapter %s. Reboot the controller for the changes to take effect.

Parameters

mode (STRING): Current adapter mode.
adapter (STRING): Name of the associated adapter.

ucm.mode.needsReboot

Severity

ERROR

Description

This message occurs when the FC adapter or converged networking adapter is unable to automatically initiate a reboot after it reconfigures from a backup. The reconfiguration requires a reboot to enable correct adapter operation.

Corrective Action

Perform a planned takeover and giveback on this controller node to enable the new adapter configuration.

Syslog Message

The adapter %s was unable to automatically initiate a reboot after reconfiguration from the backup.

Parameters

adapters (STRING): Affected adapter or adapters.

ucm.type events

ucm.type.changed

Severity

INFORMATIONAL

Description

This message occurs when the user changes the FC-4 type on a configurable adapter. The new type will take effect on the next controller reboot.

Corrective Action

(None).

Syslog Message

FC-4 type has changed to %s on adapter %s. Reboot the controller for the changes to take effect.

Parameters

type (STRING): Current adapter type.
adapter (STRING): Name of the associated adapter.
