# perfstatd.dir events

#### perfstatd.dir.permission

#### Severity

**ERROR** 

#### **Description**

This message occurs when the perfstat daemon (perfstatd) startup fails due to improper permissions for the '/mroot/etc/log' directory. This failure impacts the continuous archiving of performance data that technical support uses to troubleshoot performance issues.

#### **Corrective Action**

Verify that the permissions of the '/mroot/etc/log' directory are 'rwxr-xr-x' by executing the 'fsecurity show /vol/vol0/etc/log' command from the nodeshell. After correcting the permissions for this directory, restart perfstatd by executing the 'spmctl -e -h perfstatd' command from the freebsd shell.

#### **Syslog Message**

The perfstat daemon startup failed due to improper directory permissions.

#### **Parameters**

(None).

### perfstatd.disk events

### perfstatd.disk.full

#### Severity

**ERROR** 

#### **Description**

This message occurs when the perfstat daemon (perfstatd) startup fails due to a full disk. This failure impacts the continuous archiving of performance data that technical support uses to troubleshoot performance issues.

#### **Corrective Action**

Verify that the '/mroot' file system is full by executing the 'df /mroot' command from the freebsd shell. After clearing some space, restart perfstatd by executing the 'spmctl -e -h perfstatd' command from the freebsd shell.

#### **Syslog Message**

The perfstat daemon startup failed due to a full disk.

#### **Parameters**

(None).

## perfstatd.start events

#### perfstatd.start.unsuccessful

#### Severity

**ERROR** 

#### **Description**

This message occurs when the perfstat daemon (perfstatd) startup fails. This failure impacts the continuous archiving of performance data that technical support uses to troubleshoot performance issues.

#### **Corrective Action**

The startup failure might be due to improper permissions for the '/mroot/etc/log' directory or a full disk. Verify that the permissions of the '/mroot/etc/log' directory are 'rwxr-xr-x' by executing the 'fsecurity show /vol/vol0/etc/log' command from the nodeshell. Verify that the '/mroot' file system is not full. After fixing the cause of the failure, restart perfstatd by executing the 'spmctl -e -h perfstatd' command from the freebsd shell.

#### **Syslog Message**

The perfstat daemon startup failed.

#### **Parameters**

(None).
