application.volume.removed

Severity

ERROR

Description

This message occurs when an application is destroyed, but a member volume was not deleted after an error was encountered. This volume is no longer associated with the application and must be deleted manually.

Corrective Action

Delete the volume using the "volume delete" command. For ASA r2, contact NetApp technical support for assistance to resolve this internal error.

Syslog Message

Fails to destroy member volume %s in storage virtual machine %s during an application destroy operation. The volume must be deleted manually. The volume was previously associated with an application with UUID %s.

Parameters

volumeName (STRING): Name of the volume.

vserver (STRING): Storage virtual machine (SVM) containing the volume.

applicationUUID (STRING): Universal unique identifier (UUID) of the application.
