availability events

availability.zone events

availability.zone.full

Severity

ALERT

Description

This message occurs when the storage availability zone space usage has exceeded the full threshold value. If physical space usage surpasses 100%, the storage availability zone will be overallocated.

Corrective Action

Create space by increasing the storage availability zone size, by deleting data or by deleting Snapshot copies.

Syslog Message

Physical space used (%s%%) by storage availability zone (%s) exceeds the full threshold (%d%%).

Parameters

percent_full (STRING): Physical used space of the storage availability zone, as a percent.

pod_uuid (STRING): UUID of the storage availability zone.

percent_threshold (INT): Threshold percentage of physical used space which triggers the storage full condition.

availability.zone.nearlyFull

Severity

ERROR

Description

This message occurs when the storage availability zone space usage has exceed the nearly full threshold value.

Corrective Action

Create space by increasing the storage availability zone size, by deleting data or by deleting Snapshot copies.

Syslog Message

Physical space used (%s%%) by storage availability zone (%s) exceeds the nearly full threshold (%d%%).

Parameters

percent_full (STRING): Physical used space of the storage availability zone, as a percent.

pod_uuid (STRING): UUID of the storage availability zone.

percent_threshold (INT): Threshold percentage of physical used space which triggers the storage nearly full condition.

availability.zone.ok

Severity

NOTICE

Description

This message occurs when the storage availability zone space usage level is below the nearly full threshold value.

Corrective Action

(None).

Syslog Message

Physical space used (%s%%) by storage availability zone (%s) is below nearly full threshold (%d%%).

Parameters

percent_full (STRING): Physical used space of the storage availability zone, as a percent.

pod_uuid (STRING): UUID of the storage availability zone.

percent_threshold (INT): Threshold percentage of physical used space which triggers the storage nearly full condition.

availability.zone.overalloc

Severity

EMERGENCY

Description

This message occurs when the storage availability zone space usage has exceeded the storage availability zone size. Once the physical use is beyond 100%, it may cause the availability zone to be taken offline.

Corrective Action

Create space by increasing the storage availability zone size, by deleting data or by deleting Snapshot copies.

Syslog Message

Physical space used (%s%%) by the storage availability zone (%s) exceeds maximum space in the storage availability zone.

Parameters

percent_full (STRING): Physical used space of the storage availability zone, as a percent.

pod_uuid (STRING): UUID of the storage availability zone.
