showmount events

showmount.update events

showmount.update.failed

Severity

ERROR

Description

This message occurs when the showmount job fails to update the "exports.data" file. This file provides a list of exported volumes and qtrees on the NFS server to any clients running the "showmount -e" command.

Corrective Action

Verify that the root volume of the Vserver is online and not full. After the Vserver is online and space is available, run the following command: "export-policy cache flush -vserver <vserver-name> -cache showmount".

Syslog Message

Flushing to exports.data file failed on Vserver "%s".

Parameters

vserver (STRING): Name of the Vserver where the problem is occurring.
