- aggrcopy.src.snapshotErr 3

aggrcopy events

aggrcopy.dst events

aggrcopy.dst.autoRestrictMsg

Severity

NOTICE

Description

This event is issued when an aggregate copy start is issued on an aggregate which is offline.

Corrective Action

Aggr copy start is issued on a restricted aggregate use "aggr restrict" to restrict the destination aggregate.

Syslog Message

Aggr copy automatically restricting destination aggregate %s (currently offline).

Parameters

dst (STRING): The aggr copy destination aggregate

aggrcopy.dst.noMemory

Severity

ERROR

Description

This event is issued when there is insufficient memory on the aggr copy destination for the transfer to continue.

Corrective Action

(None).

Syslog Message

System is low on memory, aborting aggr copy destination transfer.

Parameters

(None).

aggrcopy.dst.revert

Severity

NOTICE

Description

This event is issued when an aggr copy start operation has to revert the checksum state of the destination volume aggregate because the source and destination aggregates have differing checksum states.

Corrective Action

No corrective action required.

Syslog Message

An aggr copy transfer to destination aggregate %s has found that the source and destination aggregates have differing checksum states. Data ONTAP is aborting the transfer and reverting the checksum state for the destination aggregate. After ONTAP displays a message showing the revert is complete, you will need to retry the operation. You can use the "aggr status -c" command to see the progress of the reversion.

Parameters

dst (STRING): The aggr copy destination volume

aggrcopy.dst.revertErr**Severity**

NOTICE

Description

This event is issued when a aggr copy start operation is not able to revert the checksum state of the destination aggregate.

Corrective Action

(None).

Syslog Message

ONTAP cannot revert the checksum state of destination aggregate %s.

Parameters

dst (STRING): The aggr copy destination

aggrcopy.dst.reverting**Severity**

NOTICE

Description

This event is issued when an aggr copy start operation is issued on an aggregate which is reverting its checksum state.

Corrective Action

(None).

Syslog Message

Aborting aggr copy transfer to aggregate %s because it is reverting its checksum state.

Parameters

dst (STRING): The aggr copy destination aggregate

aggrcopy.restart events

aggrcopy.restart.dst.chkFail

Severity

NOTICE

Description

This message occurs when 'aggr copy' checks for restart capability on the destination storage system fail. The 'aggr copy' transfer operation cannot be restarted. It starts as usual from the beginning (0 %) without any further user action.

Corrective Action

No action necessary

Syslog Message

Destination side checks fail; 'aggr copy' transfer starts from 0%%.

Parameters

(None).

aggrcopy.src events

aggrcopy.src.snapshotErr

Severity

ERROR

Description

This event is issued when we are not able to obtain all the snapshot information, from the vol copy source volume, required for a vol copy transfer.

Corrective Action

(None).

Syslog Message

Aggr copy not able to obtain snapshot information from source aggregate %s

Parameters

srcaggr (STRING): The aggr copy source volume
