fabriclink events

fabriclink.metadata events

fabriclink.metadata.too.long

Severity

ERROR

Description

This message occurs when object replication encounters metadata key-value pairs that are too long when replicating an object from a remote object store. The object will be replicated without the metadata key-value pairs that are too long.

Corrective Action

Refer to the sktrace.log file for additional details about the objects that are replicated without some or all metadata. Reduce the size of individual metadata key-value pairs for objects if they should be replicated with the object.

Syslog Message

There are objects with metadata key-value pairs that are too long to be replicated.

Parameters

(None).

fabriclink.retry events

fabriclink.retry.delay

Severity

NOTICE

Description

This message occurs when object replication encounters an error when attempting to contact a remote object store. The attempt will be retried after a short delay.

Corrective Action

(None).

Syslog Message

Link L%u (%s) encountered OSC error %s; will retry in %u seconds.

Parameters

linkid (INT): Link ID that encountered an error.

objstore (STRING): Object store UUID that encountered an error.

error (STRING): Error that was encountered.

delay (INT): Delay (seconds) before the attempt will be retried.
