Protocols NVMe interfaces endpoint overview

Overview

NVMe interfaces are network interfaces configured to support an NVMe over Fabrics (NVMe-oF) protocol. The NVMe interfaces are Fibre Channel (FC) interfaces supporting an NVMe-oF data protocol. Regardless of the underlying physical and data protocol, NVMe interfaces are treated equally for host-side application configuration. This endpoint provides a consolidated view of all NVMe interfaces for the purpose of configuring host-side applications.

The NVMe interfaces REST API provides NVMe-specific information about network interfaces configured to support an NVMe-oF protocol.

NVMe interfaces must be created using the protocol-specific endpoints for FC interfaces. See [POST /network/fc/interfaces](#) . After creation, the interfaces are available via this interface.

Examples

Retrieving summary information for all NVMe interfaces

```
# The API:
GET /api/protocols/nvme/interfaces

# The call:
curl -X GET 'https://<mgmt-ip>/api/protocols/nvme/interfaces' -H 'Accept:
application/hal+json'

# The response:
{
  "records": [
    {
      "svm": {
        "uuid": "013e2c44-0d30-11e9-a684-005056bbdb14",
        "name": "svml",
        "_links": {
          "self": {
            "href": "/api/svm/svms/013e2c44-0d30-11e9-a684-005056bbdb14"
          }
        }
      },
      "uuid": "74d69872-0d30-11e9-a684-005056bbdb14",
      "name": "nvme1",
      "_links": {
        "self": {
          "href": "/api/protocols/nvme/interfaces/74d69872-0d30-11e9-a684-
```

```

005056bbdb14"
    }
  },
  {
    "svm": {
      "uuid": "013e2c44-0d30-11e9-a684-005056bbdb14",

Parameters

Name	Type	In	Required	Description
svm.uuid	string	query	False	Filter by svm.uuid
svm.name	string	query	False	Filter by svm.name
enabled	boolean	query	False	Filter by enabled
name	string	query	False	Filter by name
interface_type	string	query	False	Filter by interface_type <ul style="list-style-type: none">• Introduced in: 9.10
uuid	string	query	False	Filter by uuid
fc_interface.wwpn	string	query	False	Filter by fc_interface.wwpn

Name	Type	In	Required	Description
fc_interface.port.name	string	query	False	Filter by fc_interface.port.name
fc_interface.port.uuid	string	query	False	Filter by fc_interface.port.uuid
fc_interface.port.node.name	string	query	False	Filter by fc_interface.port.node.name
fc_interface.wwnn	string	query	False	Filter by fc_interface.wwnn
transport_protocols	string	query	False	Filter by transport_protocols • Introduced in: 9.10
ip_interface.location.port.name	string	query	False	Filter by ip_interface.location.port.name • Introduced in: 9.10
ip_interface.location.port.uuid	string	query	False	Filter by ip_interface.location.port.uuid • Introduced in: 9.10
ip_interface.location.port.node.name	string	query	False	Filter by ip_interface.location.port.node.name • Introduced in: 9.10
ip_interface.ip.address	string	query	False	Filter by ip_interface.ip.address • Introduced in: 9.10

Name	Type	In	Required	Description
transport_address	string	query	False	Filter by transport_address
node.uuid	string	query	False	Filter by node.uuid
node.name	string	query	False	Filter by node.name
fields	array[string]	query	False	Specify the fields to return.
max_records	integer	query	False	Limit the number of records returned.
return_records	boolean	query	False	The default is true for GET calls. When set to false, only the number of records is returned. <ul style="list-style-type: none"> • Default value: 1
return_timeout	integer	query	False	The number of seconds to allow the call to execute before returning. When iterating over a collection, the default is 15 seconds. ONTAP returns earlier if either max records or the end of the collection is reached. <ul style="list-style-type: none"> • Default value: 1 • Max value: 120 • Min value: 0
order_by	array[string]	query	False	Order results by specified fields and optional [asc

Response

Status: 200, Ok

Name	Type	Description
_links	_links	
num_records	integer	The number of records in the response.
records	array[nvme_interface]

nvme_interface

NVMe interfaces are network interfaces configured to support an NVMe over Fabrics (NVMe-oF) protocol. The NVMe interfaces are Fibre Channel interfaces supporting an NVMe-oF data protocol. Regardless of the underlying physical and data protocol, NVMe interfaces are treated equally for host-side application configuration. This endpoint provides a consolidated view of all NVMe interfaces for the purpose of configuring host-side applications.

NVMe interfaces must be created using the protocol-specific endpoints for Fibre Channel interfaces. See [POST /network/fc/interfaces](#) . After creation, the interfaces are available via this interface.

Name	Type	Description
<code>_links</code>	_links	

Name	Type	Description
enabled	boolean	The administrative state of the NVMe interface.
fc_interface	fc_interface	The attributes specific to a Fibre Channel-based NVMe interface. This is populated when <code>interface_type</code> is <code>fc_interface</code> .
interface_type	string	The underlying interface type of the NVMe interface. This property identifies which of <code>fc_interface</code> and <code>ip_interface</code> will be further populated.
ip_interface	ip_interface	The attributes specific to an IP-based NVMe interface. This is populated when <code>interface_type</code> is <code>ip_interface</code> .
name	string	The name of the NVMe interface.
node	node	
svm	svm	
transport_address	string	The transport address of the NVMe interface.
transport_protocols	array[string]	The transport protocols supported by the NVMe interface.
uuid	string	The unique identifier of the NVMe interface.

error_arguments

Name	Type	Description
code	string	Argument code
message	string	Message argument

error

Name	Type	Description
arguments	array[error_arguments]	Message arguments
code	string	Error code
message	string	Error message
target	string	The target parameter that caused the error.

Retrieve an NVMe interface

GET /protocols/nvme/interfaces/{uuid}

Introduced In: 9.6

Retrieves an NVMe interface.
