# View and update Kerberos interfaces

## Protocols NFS Kerberos interfaces endpoint overview

### Examples

#### Retrieving the Kerberos interface configuration details

```
# The API:
GET /api/protocols/nfs/kerberos/interfaces

# The call:
curl -X GET "https://<mgmt-ip>/api/protocols/nfs/kerberos/interfaces"
```

#### Updating the Kerberos interface configuration

```
# The API:
PATCH /api/protocols/nfs/kerberos/interfaces/{interface.uuid}

# The call:
curl -d "@test_patch_kerb_interface.txt" -X PATCH "https://<mgmt-ip>/api/protocols/nfs/kerberos/interfaces/e62936de-7342-11e8-9eb4-0050568be2b7"
test_patch_kerb_interface.txt (body):
{
  "enabled" : "true",
  "spn": "nfs/datalif1-vsime3-d1.sim.netapp.com@NFS-NSR-W01.RTP.NETAPP.COM",
  "user" : "administrator",
  "password" : "Hello123!"
}
```

## Retrieve Kerberos interfaces

```
GET /protocols/nfs/kerberos/interfaces
```

**Introduced In:** 9.6

Retrieves Kerberos interfaces.

### Related ONTAP commands

- `vserver nfs kerberos interface show`

## Learn more

- [DOC /protocols/nfs/kerberos/interfaces](#)

## Parameters

| Name                 | Type          | In    | Required | Description   |
|----------------------|---------------|-------|----------|---|
| svm.uuid             | string        | query | False    | Filter by svm.uuid  |
| svm.name             | string        | query | False    | Filter by svm.name  |
| encryption_types     | string        | query | False    | Filter by encryption_types  |
| spn                  | string        | query | False    | Filter by spn   |
| enabled              | boolean       | query | False    | Filter by enabled   |
| interface.name       | string        | query | False    | Filter by interface.name  |
| interface.uuid       | string        | query | False    | Filter by interface.uuid  |
| interface.ip.address | string        | query | False    | Filter by interface.ip.address  |
| fields               | array[string] | query | False    | Specify the fields to return.   |
| max_records          | integer       | query | False    | Limit the number of records returned.   |
| return_records       | boolean       | query | False    | The default is true for GET calls. When set to false, only the number of records is returned.<br><ul style="list-style-type: none"><li>• Default value: 1</li></ul> |

| Name           | Type          | In    | Required | Description  |
|----------------|---------------|-------|----------|--|
| return_timeout | integer       | query | False    | <p>The number of seconds to allow the call to execute before returning. When iterating over a collection, the default is 15 seconds. ONTAP returns earlier if either max records or the end of the collection is reached.</p> <ul style="list-style-type: none"> <li>• Default value: 1</li> <li>• Max value: 120</li> <li>• Min value: 0</li> </ul> |
| order_by       | array[string] | query | False    | Order results by specified fields and optional [asc  |

## Response

Status: 200, Ok

| Name        | Type  | Description       |
|-------------|---|-------------------|
| _links      | <a href="#">_links</a>                      |                   |
| num_records | integer                                     | Number of records |
| records     | array[ <a href="#">kerberos_interface</a> ] |                   |

## Example response

```
{

| Name | Type   | Description |
|------|--------|-------------|
| href | string |             |

\_links

| Name | Type                 | Description |
|------|----------------------|-------------|
| self | <a href="#">href</a> |             |

ip

IP information

| Name    | Type   | Description          |
|---------|--------|----------------------|
| address | string | IPv4 or IPv6 address |

interface

Network interface

| Name   | Type                   | Description                                      |
|--------|------------------------|--|
| _links | <a href="#">_links</a> |  |
| ip     | <a href="#">ip</a>     | IP information                                   |
| name   | string                 | The name of the interface.                       |
| uuid   | string                 | The UUID that uniquely identifies the interface. |

svm

| Name   | Type                   | Description                       |
|--------|------------------------|-----------------------------------|
| _links | <a href="#">_links</a> |                                   |
| name   | string                 | The name of the SVM.              |
| uuid   | string                 | The unique identifier of the SVM. |

kerberos\_interface

| Name                | Type                      | Description                             |
|---------------------|---------------------------|---|
| _links              | <a href="#">_links</a>    |   |
| enabled             | boolean                   | Specifies if Kerberos is enabled.       |
| encryption_types    | array[string]             |   |
| interface           | <a href="#">interface</a> | Network interface                       |
| keytab_uri          | string                    | Load keytab from URI                    |
| organizational_unit | string                    | Organizational unit                     |
| password            | string                    | Account creation password               |
| spn                 | string                    | Service principal name. Valid in PATCH. |
| svm                 | <a href="#">svm</a>       |   |
| user                | string                    | Account creation user name              |

#### error\_arguments

| Name    | Type   | Description      |
|---------|--------|------------------|
| code    | string | Argument code    |
| message | string | Message argument |

#### error

| Name      | Type                                     | Description                                 |
|-----------|--|---|
| arguments | array[ <a href="#">error_arguments</a> ] | Message arguments                           |
| code      | string                                   | Error code                                  |
| message   | string                                   | Error message                               |
| target    | string                                   | The target parameter that caused the error. |
