# View and create EMS role-based configurations

## Support EMS role-configs endpoint overview

### Overview

Manages the list of access control roles that have limited access to the EMS events and configurations. Access to the EMS events and configurations are controlled by the EMS role-based configuration, which has the following two properties:

- `event_filter`
- `limit_access_to_global_configs`

### Role-based event filter

A role-based event filter is a filter assigned to an access control role that limits what events users of that role have access to. It is applied transparently when a user of that role performs GET requests on the following endpoints:

- `/support/ems/events`
- `/support/ems/messages`

## It is also applied when events are forwarded as notifications to destinations created by users of that role. To those destinations, only events that match the role-based filter in addition to the filters configured on the destinations are forwarded.

### Limiting access to the global EMS configurations

The APIs at the `/api/support/ems` endpoint expose several configuration properties that affect how EMS handles events. The following properties are always accessible by all roles that have access to the `/api/support/ems` APIs.

- `mail_from`
- `mail_server`
- `proxy_url`
- `proxy_user`
- `proxy_password`

## Access to the following property by an access control role can be restricted:

- `pubsub_enabled`

## Limiting access to EMS events and configurations is typically applied for an access control role that is designed to have limited administrative capabilities. For example, when the cluster is physically managed by a service provider and the services are managed by the customer.

## Examples

### Retrieving the list of EMS role-based configurations

```
# The API:
GET /api/support/ems/role-configs

# The call:
curl -X GET "https://<mgmt-ip>/api/support/ems/role-configs" -H "accept:
application/hal+json"

# The response:
200 OK

# JSON Body
{
  "records": [
    {
      "access_control_role": {
        "name": "storage-admin",
        "_links": {
          "self": {
            "href": "/api/security/roles/0b2580c8-de36-4213-bfca-
88cdaaaf3ae6/storage-admin"
          }
        }
      },
      "event_filter": {
        "name": "storage-admin-events",
        "_links": {
          "self": {
            "href": "/api/support/ems/filters/storage-admin-events"
          }
        }
      },
      "limit_access_to_global_configs": true,
      "_links": {
        "self": {
          "href": "/api/support/ems/role-configs/storage-admin"
        }
      }
    },
    {
      "access_control_role": {
        "name": "network-admin",
        "_links": {
```

```

    "self": {
      "href": "/api/security/roles/0b2580c8-de36-4213-bfca-88cdaaaf3ae6/network-admin"
    }
  },
  "filter_filter": {
    "name": "network-admin-events",
    "_links": {
      "self": {
        "href": "/api/support/ems/filters/network-admin-events"
      }
    }
  },
  "limit_access_to_global_configs": true,
  "_links": {
    "self": {
      "href": "/api/support/ems/role-configs/network-admin"
    }
  }
},
],
"num_records": 2,
"_links": {
  "self": {
    "href": "/api/support/ems/role-configs"
  }
}
}
}

```

### Creating an EMS role-based configuration for an access control role

```

# The API:
POST /api/support/ems/role-configs

# The call:
curl -X POST "https://<mgmt-ip>/api/support/ems/role-configs" -H "accept:
application/hal+json" -H "Content-Type: application/json" -d
"@role_configs_post.txt"
role_configs_post.txt (body):
{
  "access_control_role": {
    "name": "storage-admin"
  },
  "event_filter": {
    "name": "storage-admin-events"
  },
  "limit_access_to_global_configs": true
}

# The response:
201 Created

```

## Retrieve EMS role-based configurations

GET /support/ems/role-configs

**Introduced In:** 9.13

Retrieves a collection of the EMS role-based configurations.

### Related ONTAP commands

- `event role-config show`

### Parameters

Name	Type	In	Required	Description
access_control_role.name	string	query	False	Filter by access_control_role.name
event_filter.name	string	query	False	Filter by event_filter.name

Name	Type	In	Required	Description
limit_access_to_global_configs	boolean	query	False	Filter by limit_access_to_global_configs
fields	array[string]	query	False	Specify the fields to return.
max_records	integer	query	False	Limit the number of records returned.
return_records	boolean	query	False	The default is true for GET calls. When set to false, only the number of records is returned. <ul style="list-style-type: none"> <li>• Default value: 1</li> </ul>
return_timeout	integer	query	False	The number of seconds to allow the call to execute before returning. When iterating over a collection, the default is 15 seconds. ONTAP returns earlier if either max records or the end of the collection is reached. <ul style="list-style-type: none"> <li>• Default value: 1</li> <li>• Max value: 120</li> <li>• Min value: 0</li> </ul>
order_by	array[string]	query	False	Order results by specified fields and optional [asc

## Response

Status: 200, Ok

Name	Type	Description
_links	<a href="#">_links</a>	
num_records	integer	Number of records
records	array[ <a href="#">records</a> ]	

### Example response

```

{
  "_links": {
    "next": {
      "href": "/api/resourcelink"
    },
    "self": {
      "href": "/api/resourcelink"
    }
  },
  "num_records": 1,
  "records": {
    "_links": {
      "self": {
        "href": "/api/resourcelink"
      }
    },
    "access_control_role": {
      "_links": {
        "self": {
          "href": "/api/resourcelink"
        }
      },
      "name": "admin"
    },
    "event_filter": {
      "_links": {
        "self": {
          "href": "/api/resourcelink"
        }
      },
      "name": "important-events"
    }
  }
}

```

## Error

Status: Default, Error

Name	Type	Description
error	<a href="#">returned_error</a>	

### Example error

```
{
  "error": {
    "arguments": {
      "code": "string",
      "message": "string"
    },
    "code": "4",
    "message": "entry doesn't exist",
    "target": "uuid"
  }
}
```

## Create an EMS role-based configuration for an access control role

POST /support/ems/role-configs

**Introduced In:** 9.13

Creates an EMS role-based configuration for an access control role.

### Required properties

- `access_control_role` - Uniquely identifies the access control role.

### Recommended optional properties

- `event_filter` - Identifies the event filter.
- `limit_access_to_global_configs` - Indicates whether the access control role has limited access to global EMS configurations.

## Related ONTAP commands

- `event role-config create`

## Parameters

Name	Type	In	Required	Description
return_records	boolean	query	False	The default is false. If set to true, the records are returned.  • Default value:

## Request Body

Name	Type	Description
_links	<a href="#">_links</a>	
access_control_role	<a href="#">access_control_role</a>	Access control role that the event filter is assigned to.
event_filter	<a href="#">event_filter</a>	Event filter that is assigned to the access control role.
limit_access_to_global_configs	boolean	Indicates whether the access control has limited access to global EMS configurations.

## Example request

```
{
  "_links": {
    "self": {
      "href": "/api/resourcelink"
    }
  },
  "access_control_role": {
    "_links": {
      "self": {
        "href": "/api/resourcelink"
      }
    },
    "name": "admin"
  },
  "event_filter": {
    "_links": {
      "self": {
        "href": "/api/resourcelink"
      }
    },
    "name": "important-events"
  }
}
```

## Response

Status: 201, Created

Name	Type	Description
<code>_links</code>	<code><a href="#">_links</a></code>	
<code>num_records</code>	integer	Number of records
<code>records</code>	array[ <code><a href="#">records</a></code> ]	

## Example response

```
{
  "_links": {
    "next": {
      "href": "/api/resourcelink"
    },
    "self": {
      "href": "/api/resourcelink"
    }
  },
  "num_records": 1,
  "records": {
    "_links": {
      "self": {
        "href": "/api/resourcelink"
      }
    },
    "access_control_role": {
      "_links": {
        "self": {
          "href": "/api/resourcelink"
        }
      },
      "name": "admin"
    },
    "event_filter": {
      "_links": {
        "self": {
          "href": "/api/resourcelink"
        }
      },
      "name": "important-events"
    }
  }
}
```

## Headers

Name	Description	Type
