Editing broadcast domain settings

You can use System Manager to modify the attributes of a broadcast domain such as the name, the MTU size, and the ports that are associated with the broadcast domain.

About this task

- You must not modify the MTU size of the broadcast domain to which the management port e0M is assigned.
- You cannot use System Manager to edit broadcast domains in the cluster IPspace.

You must use the command-line interface (CLI) instead.

Steps

1. Click **Network > Broadcast Domains**.
2. Select the broadcast domain that you want to modify, and then click **Edit**.
3. In the **Edit Broadcast Domain** dialog box, modify the broadcast domain attributes as required.
4. Click **Save and Close**.

Deleting broadcast domains

You can delete a broadcast domain by using System Manager when you no longer require the broadcast domain.

Before you begin

No subnets must be associated with the broadcast domain that you want to delete.

About this task

- When you delete a broadcast domain, the ports that are associated with the broadcast domain are assigned to the default IPspace, and the MTU settings of the ports are not changed.
- You cannot use System Manager to delete broadcast domains that are in the cluster IPspace.

You must use the command-line interface (CLI) instead.

Steps

1. Click **Network > Broadcast Domains**.

2. Select the broadcast domain that you want to delete, and then click **Delete**.
3. Select the confirmation check box, and then click **Delete**.
