## Viewing the LDAP client configuration

You can use System Manager to view the LDAP clients that are configured for a storage virtual machine (SVM) in a cluster.

### Steps

1. Click .
2. In the **Setup** pane, click **LDAP**.

The list of LDAP clients are displayed in the LDAP window.

## Using LDAP services

An LDAP server enables you to centrally maintain user information. If you store your user database on an LDAP server in your environment, you can configure your storage virtual machine (SVM) to look up user information in your existing LDAP database.

### About this task

ONTAP supports LDAP for user authentication, file access authorization, and user lookup and mapping services between NFS and CIFS.

## LDAP window

You can use the LDAP window to view LDAP clients for user authentication, file access authorization, and user search, and to map services between NFS and CIFS at the cluster level.

### Command buttons

- **Add**

Opens the Create LDAP Client dialog box, which enables you to create and configure LDAP clients.

- **Edit**

Opens the Edit LDAP Client dialog box, which enables you to edit LDAP client configurations. You can also edit active LDAP clients.

- **Delete**

Opens the Delete LDAP Client(s) dialog box, which enables you to delete LDAP client configurations. You can also delete an active LDAP client.

- **Refresh**

Updates the information in the window.

## **LDAP client list**

Displays (in tabular format) details about LDAP clients.

- **LDAP Client Configuration**

Displays the name of the LDAP client configuration that you specified.

- **Storage Virtual Machine**

Displays the name of the storage virtual machine (SVM) for each LDAP client configuration.

- **Schema**

Displays the schema for each LDAP client.

- **Minimum Bind Level**

Displays the minimum bind level for each LDAP client.

- **Active Directory Domain**

Displays the Active Directory domain for each LDAP client configuration.

- **LDAP Servers**

Displays the LDAP server for each LDAP client configuration.

- **Preferred Active Directory Servers**

Displays the preferred Active Directory server for each LDAP client configuration.
