ONTAP 9.18.1

Disable automatic enablement of Autonomous Ransomware Protection before reverting from ONTAP 9.18.1

If you upgraded volumes to ONTAP 9.18.1, ONTAP ARP automatic enablement might have been set for your volumes after a brief grace period (12 hours). It's recommended that you disable this automatic enablement setting on volumes upgraded to ONTAP 9.18.1 before reverting to ONTAP 9.17.1 or earlier.

Steps

1. Determine if the automatic enablement option has been activated on volumes that have been upgraded to ONTAP 9.18.1 or later:

```
security anti-ransomware auto-enable show
```

2. Disable the automatic enablement option for ransomware protection on all volumes on the SVM:

```
security anti-ransomware volume disable -volume * -auto-enabled-volumes  
-only true
```
