# Extend the time of a guest file restore session

By default, an attached Guest File Restore VMDK is available for 24 hours and then it is automatically detached. You can extend the time in the **Guest Configuration** page.

## About this task

You might want to extend a guest file restore session if you want to restore additional files or folders from the attached VMDK at a later time. However, because guest file restore sessions use a lot of resources, extending the session time should be performed only occasionally.

## Steps

1. In the VMware vSphere web client, click **Guest File Restore**.
2. Select a guest file restore session and then click the Extend Selected Guest Session icon in the Guest Session Monitor title bar.

The session is extended for another 24 hours.
