# Log in to the SnapCenter VMware vSphere Web Client

When SnapCenter Plug-in for VMware vSphere is deployed, it installs a VMware vSphere web client on vCenter, which is displayed on the vCenter screen with other vSphere web clients.

## Before you begin

Transport Layer Security (TLS) must be enabled in vCenter. Refer to the VMware documentation.

## Steps

1. In your browser, navigate to VMware vSphere vCenter.
2. On the VMware screen, **click vSphere Client (HTML5)**.
3. Log in to the **VMware vCenter Single Sign-On** page.

Click the **Login** button. Due to a known VMware issue, do not use the ENTER key to log in. For details, see the VMware documentation on ESXi Embedded Host Client issues.

4. On the **VMware vSphere Web Client** page, click Menu in the toolbar, and then select **SnapCenter Plug-in for VMware vSphere**.
