APP commands

The following table lists the application (APP) commands.

Command	Description
APP_CLONE_FOLLOW_UP_CMD ##	These are scripts or commands to be executed after the database is cloned, where ## is a number between 01 and 99, inclusive. This can be used to perform application-specific followup activities on SAP systems, such as installing a SAP license, adjusting database tables, deleting or updating content, and starting up the application.
APP_QUIESCE_CMD ##	These are scripts or commands that put your application into backup mode, where ## is a number between 01 and 99, inclusive. Note: This is ignored if you use APP_NAME, because it is in that case handled internally in Snap Creator.
APP_UNQUIESCE_CMD ##	These are scripts or commands that take your application out of backup mode, where ## is a number from 01 to 99, inclusive. Note: This is ignored if you use APP_NAME because it is in that case handled internally in Snap Creator.
ARCHIVE_CMD ##	This command handles database archiving; it can also be used as a wrapper to run other scripts, where ## is a number from 01 through 99.
