Archive log plug-in 1

Archive log plug-in

The Archive log plug-in works with Snap Creator Archive logs and not with the logs of any application or database.

The following table lists the Archive log plug-in parameters, provides their settings, and describes them:

| Parameter | Setting | Description |
|----------------------------|--|--|
| ARCHIVE_LOG_ENABLE | (Y | N |
| policy:age) | Enables archive log management (deletion of the old archive logs). | ARCHIVE_LOG_RETENTION |
| number_of_days | Specifies the number of days the archive logs are retained. This setting must be equal to or greater than NTAP_SNAPSHOT_RETENTIONS. | ARCHIVE_LOG_DIR |
| change_info_directory/logs | Specifies the path to the directory that contains the archive logs. | ARCHIVE_LOG_EXT |
| file_extension | Specifies the file extension of the archive logs. For example, if the archive logs are 10192091019.log, specify this parameter setting to LOG. | ARCHIVE_LOG_RECURSIVE_SE ARCH |
| (Y | N) | Enables the management of archive logs within subdirectories. If the archive logs are located under subdirectories, you should use this parameter. |
