Changing the Snap Creator Agent port after installation

To change the port on which the Snap Creator Agent is listening, you can make a change in the `Snap Creatoragent.properties` file and restart the agent.

The procedure for changing the Snap Creator Agent port is the same for Windows and UNIX. The following procedure uses examples from the UNIX environment.

1. Log in to the system on which the Snap Creator Agent is running, and switch to the `etc` subdirectory within the installation directory.

```
cd /install_path/scAgent4.3.0/etc
```

2. Open the `agent.properties` file using a text editor.
3. Change the value of the `DEFAULT_PORT` parameter to the new port (by default, the port is 9090).

For example, to use port 9191, change the `DEFAULT_PORT` parameter as follows:

```
DEFAULT_PORT=9191
```

4. Save and close the `agent.properties` file.
5. Restart the Snap Creator Agent.

```
/install_path/scAgent4.3.0/bin/scAgent restart
```

If the Snap Creator Agent is running when any changes are made to the `allowed_commands.config` file or the `agent.properties` file, then the agent must be restarted.
