# Unmounting clones

You can unmount (or delete) clones.

1. From the Snap Creator GUI main menu, select **Management > Configurations**.
2. From the **Configurations** tab, select a configuration file, and then select **Actions > Unmount**.
3. From the Additional parameters window, select the controller, volume, Snapshot copy policy containing the mounted backup, and specific Snapshot copy name on which the clone was created; then click **OK**.

The clone is unmounted; the Snapshot copy is not deleted.
