Deleting configuration files from a profile 1

Deleting configuration files from a profile

You can delete configuration files from a profile.

When deleting configuration files, schedules associated with the configuration are also removed as part of the process.

1. From the Snap Creator GUI main menu, select **Management > Configurations**.
2. From the Profiles and Configurations pane, expand the content for the profile.

The assigned configuration files assigned to the profile are listed below the profile name.

3. Right-click the configuration file and select **Delete**.
4. Click **Yes** in the confirmation window.

The configuration file is removed from the list under the profile name and is permanently deleted from the Snap Creator Server.
