Viewing job status and logs 1

Viewing job status and logs

You can view the status of a job in the Snap Creator Job Monitor. You can view a log of job actions in the Console pane while the job is running, or in the Out Log for the job. A number of specialized logs also are available.

You can view the following logs in the GUI:

Log	Description
Out	Provide verbose-level information for a job.
Debug	Provides verbose-level information plus information useful in debugging.
GUI	Provides information about Snap Creator GUI actions.
Stderr	Provides information about errors written to standard error (Reports pane only).
Error	Provides all error information (Reports pane only).

You can view all the logs in a text editor if you prefer not to use the Job Monitor or Reports pane. Logs reside in the installation directory for the Snap Creator Server.
