Modifying the housekeeping of log backups

You can modify the parameters that are configured for the housekeeping of log backups if you want to disable the log cleanup operation.

1. Select the SAP HANA profile that you want to modify.
2. Select the configuration you want to modify, and click **SAP HANA Settings**.
3. Edit the Enable LOG cleanup parameter, and click **Save**.

The screenshot shows the SAP HANA configuration interface. At the top, there are tabs for 'General', 'Connection', 'Volumes', 'Snapshot settings', 'SnapMirror settings', 'SnapVault settings', 'Clone settings', 'OnCommand/DFM', 'Archive Log Management', 'SAP HANA', and 'HANA P'. Below these are sub-tabs for 'HANA Integrity Check Settings', 'Agent', 'Event settings', and 'Commands'. The 'SAP HANA' tab is selected. The main area contains several configuration fields:
