Scheduling database integrity checks 1

Scheduling database integrity checks

For SAP HANA configurations, you can schedule additional operations such as file-based backup and database integrity checks. You can schedule the database integrity checks operation to occur at specific intervals.

1. From the main menu of the Snap Creator GUI, select **Management > Schedules**, and click **Create**.
2. In the New Job window, enter the details for the job.

The integrity check policy is set to “none” by default.

The screenshot shows a 'New Job' configuration window with the following fields and values:

- Job Name: SAPFBBBackup
- Start Date: 2016-01-22
- Active:
- Profile: SAP_HANA
- Configuration: SCN_HANA
- Action: integrityCheck
- Policy: none
- Frequency: (empty dropdown)

A 'Save' button is located at the bottom of the window.
