Managing profiles

You can create, view, and delete profiles.

A profile is essentially a folder used for organizing configuration files. Profiles also act as objects for role-based access control (RBAC), meaning that users can be allowed access to only certain profiles and the configuration files contained within.

Creating profiles

You can create profiles to organize configuration files by using the Snap Creator GUI.

The first time that you open the Snap Creator GUI, the New Profile dialog box is displayed automatically, prompting you to create a new profile.

1. From the Snap Creator GUI main menu, select **Management > Configurations**.
2. From the **Profiles and Configurations** pane, click **Add Profile**.

The New Profile dialog box is displayed.

3. Enter the name of the new profile, and then click **OK**.

The new profile is listed in the **Profiles and Configurations** pane, and the Configuration wizard is displayed in the right pane.

Viewing profiles

You can list the existing Snap Creator profiles.

1. From the Snap Creator GUI main menu, select **Management > Configurations**.

The existing Snap Creator profiles are listed in the Profiles and Configurations pane.

Deleting profiles

You can delete Snap Creator profiles.

Deleting a profile also deletes any configuration files associated with the profile.

1. From the Snap Creator GUI main menu, select **Management > Configurations**.

The existing Snap Creator profiles are listed in the Profiles and Configurations pane.

2. Right-click the profile to be deleted and select **Delete**.
3. Click **Yes** in the confirmation message

The profile and associated configuration files are permanently deleted from Snap Creator.
